REGIONAL TRANSPORTATION PLAN 2022–2050

Adopted May 26, 2022

Updated July 2025

Regional Transportation Plan

Appendix D: Regional Capacity Projects

Note: Project costs are expressed in 2022 dollars and are sorted by sponsor.

Sponsor: **AUBURN**
Project ID: **4287**
Title: **Auburn Way S (SR-164) - Hemlock to Poplar**

MTP Status: **Approved**
Estimated Cost: **$10,313,155**

Description:
The project will widen Auburn Way S between Hemlock St SE and Poplar St SE to accommodate two lanes in each direction, center turn lane and/or medians to provide access management where feasible, sidewalks, bus pull-outs, street lighting and storm improvements. The project will also add an eastbound turnaround and enhanced pedestrian crossing near Redwood Court. The project length is approximately 2,500 feet. The project is needed to provide additional vehicular capacity, transit, and non-motorized facilities on the corridor.

Location / Facility:	From:	To:
Auburn Way S (SR-164)	Hemlock St	Poplar St
County:	**Completion Year:**	**Prioritization Score:**
King County	2025	51

Sponsor: **AUBURN**
Project ID: **5551**
Title: **Auburn Way S (SR-164) 32nd Street SE to City Limit**

MTP Status: **Candidate**
Estimated Cost: **$16,963,221**

Description:
Widen Auburn Way S to accommodate two general purpose lanes in each direction, center turn lanes, access management medians, U-turns, curb, gutter, sidewalk, illumination, transit stop improvements, new traffic signals, Intelligent Transportation Systems, streetscape and storm improvements.

Location / Facility:	From:	To:
Auburn Way S (SR-164)	32nd St SE	City Limit
County:	**Completion Year:**	**Prioritization Score:**
King County	2035	39

Sponsor: **AUBURN**
Project ID: **5552**
Title: **Auburn Way S (SR-164) Poplar to 32nd Street SE)**

MTP Status: **Candidate**
Estimated Cost: **$18,739,138**

Description:
Widen Auburn Way S to accommodate two general purpose lanes in each direction, center turn lanes, access management medians, U-turns, curb, gutter, sidewalk, illumination, transit stop improvements, new traffic signals, Intelligent Transportation Systems, streetscape and storm improvements.

Location / Facility:	From:	To:
Auburn Say S (SR-164)	Poplar St	32nd St SE
County:	**Completion Year:**	**Prioritization Score:**
King County	2030	42

Sponsor: **AUBURN**
Project ID: **5716**
Title: **E Valley Highway Widening**

MTP Status: **Candidate**
Estimated Cost: **$9,300,000**

Description:
This project will widen E Valley Highway between Lakeland Hills Way and Terrace View Drive SE, approximately 0.6 miles. The roadway will have a four/five lane cross section with a trail connection along the east side. Other project elements include storm improvement, illumination and ITS. The project will provide congestion relief along the corridor and provide access for non-motorized users.

Location / Facility:	From:	To:
E Valley Hwy E	Lakeland Hills Way SE	E Valley Access Road
County:	**Completion Year:**	**Prioritization Score:**
Multiple Counties (any combination)	2028	49

Sponsor: **AUBURN**
Project ID: **5555**
Title: **M Street NE Widening (E Main St to 4th St NE)**

MTP Status: **Candidate**
Estimated Cost: **$2,938,478**

Description:
This project will construct a complete four/five-lane street section on M St NE from south of E Main St to 4th St NE, and reconstruct the signal at E Main St.

Location / Facility:	From:	To:
M Street NE	E Main St	4th St NE
County:	Completion Year:	Prioritization Score:
King County	2024	41

Sponsor: **AUBURN**
Project ID: **5553**
Title: **M Street SE Corridor Improvements (8th St SE to Auburn Way S)**

MTP Status: **Candidate**
Estimated Cost: **$6,847,109**

Description:
The project will widen M Street SE to create a multi-lane arterial between 8th St SE and Auburn Way S. The project also includes the construction of a new traffic signal at the intersection with 12th St SE, illumination and non-motorized facilities.

Location / Facility:	From:	To:
M Street SE	8th Street SE	Auburn Way S
County:	Completion Year:	Prioritization Score:
King County	2030	42

Sponsor: **BAINBRIDGE ISLAND**
Project ID: **5646**
Title: **Agate Pass Bridge Replacement**

MTP Status: **Unprogrammed**
Estimated Cost: **$170,702,314**

Description:
Replace existing functionally obsolete Agate Pass bridge on SR305 with new bridge with additional capacity for transit and pedestrian/bicycle facilities.

Location / Facility:	From:	To:
SR305	N/A	N/A
County:	**Completion Year:**	**Prioritization Score:**
Kitsap County	2027	34

Sponsor: **BAINBRIDGE ISLAND**
Project ID: **5647**
Title: **Sound to Olympics Trail Segment**

MTP Status: **Unprogrammed**
Estimated Cost: **$20,000,000**

Description:
Shared-use path adjacent in right-of-way of SR305 from the Bainbridge Island WSDOT Ferry terminal to the Agate Pass bridge. The path will connect from the bridge through Kitsap County to the Olympic Discovery Trail in Jefferson County.

Location / Facility:	From:	To:
SR305	WSDOT Ferry Terminal	Agate Pass Bridge
County:	**Completion Year:**	**Prioritization Score:**
Kitsap County	2026	39

Sponsor: BELLEVUE
Project ID: 5765
Title: 150th Avenue SE Mobility Improvements

MTP Status: Approved
Estimated Cost: $16,894,180

Description:
Rechannelize 150th Avenue SE southbound to include a third travel lane from SE 28th Street to SE 38th Street; widen the 150th Avenue SE/Eastgate Way intersection to add a second northbound left turn pocket on 150th Avenue SE and second westbound receiving lane on Eastgate Way; widen the 150th Avenue SE/SE 37th Street intersection to add a second westbound left turn pocket on SE 37th Street and a second eastbound right turn pocket from the I-90 off ramp to 150th Avenue SE as well as eliminate the unnecessary eastbound left turn option on this leg; provide widening and channelization improvements along SE 37th Street from 150th Avenue SE to the I-90 eastbound on-ramp; re-channelize and add turn lane extensions on the 150th Avenue SE I-90 overpass; and provide intersection re-channelization and signal enhancements at the intersection of 150th Avenue SE and SE 38th Street.

Location / Facility:	From:	To:
150th Avenue SE	SE 28th Street	SE 38th Street
County:	**Completion Year:**	**Prioritization Score:**
King County	2027	57

Sponsor: BELLEVUE
Project ID: 5641
Title: Bellevue Way SE Southbound HOV Lane

MTP Status: Candidate
Estimated Cost: $34,029,792

Description:
Construct an inside High Occupancy Vehicle (HOV) lane and an outside sidewalk or shoulder on southbound Bellevue Way SE between the intersection of 108th Avenue SE and Bellevue Way on the north and the main entrance to the South Bellevue Park & Ride on the south end. The HOV lane segment between the South Bellevue Park & Ride and I-90 will be built by Sound Transit as part of the East Link project. The improvements may extend to all legs of affected intersections to accommodate or optimize the function of the HOV lane. This project may be phased.

Location / Facility:	From:	To:
Bellevue Way SE	S. Bellevue Park & Ride (Main Entrance at 112th Ave SE)	`Y` between Bellevue Way SE and 108th Ave SE
County:	**Completion Year:**	**Prioritization Score:**
King County	2040	48

Sponsor: BELLEVUE
Project ID: 4524
Title: Bel-Red Regional Connectivity - NE 6th St Extension

MTP Status: Candidate
Estimated Cost: $100,803,623

Description:
This project will extend the existing NE 6th St transit and HOV ramp, which provides access to the I-405 northbound and southbound express toll lanes, eastward from the middle of the freeway. The new road would extend as a transit/HOV facility to an at-grade intersection with 116th Ave NE and continue, likely as a general purpose roadway, to 120th Ave NE. An alternative to be further analyzed would extend the roadway as a grade-separated facility over 116th Ave NE to connect with 120th Ave NE. The project will include or be coordinated with a separate project to implement a non-motorized crossing of I-405 in the vicinity. This project may be phased.

Location / Facility:	From:	To:
NE 6th Street	112th Avenue NE	120th Avenue NE
County:	Completion Year:	Prioritization Score:
King County	2040	60

Sponsor: BELLEVUE
Project ID: 5501
Title: Mountain to Sound Greenway Trail

MTP Status: Candidate
Estimated Cost: $40,878,264

Description:
Construct a paved multipurpose trail beginning at 142nd Place SE, then following a new grade-separated alignment eastward along the south side of I-90 and the north side of SE 36th St to the curve near the 150th Ave SE interchange with I-90, then following a new independent alignment to the south of the interchange and north of the 150th Avenue SE/SE 37th St intersection. Eastward from 150th Ave SE, the trail will continue at grade on the south side of I-90 and the north side of SE 37th St. Eastward from the termination of SE 37th St, the trail will continue on the south side of I-90 and the north side of private properties and/or Newport Way to the intersection of Lakemont Blvd SE and Newport Way.

Location / Facility:	From:	To:
Parallel to the South Side of I-90	142nd Ave SE	Lakemont Blvd
County:	Completion Year:	Prioritization Score:
King County	2040	46

Sponsor: **BELLEVUE**
Project ID: **5710**
Title: **Mountains to Sound Greenway Trail: 132nd Ave SE to 142nd Pl SE**

MTP Status: **Approved**
Estimated Cost: **$8,800,068**

Description:
Design and construct a separated multi-use trail along the south side of I-90 from 132nd Ave SE to the I-90 overcrossing of 142nd Place SE. In general, the trail will include a 12-foot-wide, hard surface facility, trailhead treatments, wayfinding, landscaped buffer in some areas, lighting, and storm drainage improvements. This project will also provide a signal modification at 136th Place SE and a mid-block pedestrian crossing with RRFB and median island within the 13400 block of SE 36th Street.

Location / Facility:	From:	To:
Parallel to the South Side of I-90	132nd Ave SE	142nd Pl SE
County:	Completion Year:	Prioritization Score:
King County	2022	46

Sponsor: **BELLEVUE**
Project ID: **5804**
Title: **Mountains to Sound Greenway Trail: 142nd Pl SE to I-90 Non-Motorized Overcrossing at 150th Ave SE**

MTP Status: **Approved**
Estimated Cost: **$13,143,384**

Description:
Design and construct a section of a separated multi-use trail along the south side of I-90 from 142nd Place SE to the non-motorized overcrossing of I-90 at 150th Ave SE. In general, the trail will include a 12-foot-wide, hard surface facility, trailhead treatments, wayfinding, landscaped buffer in some areas, lighting and storm drainage improvements. This section will also provide a mid-block pedestrian crossing west of 146th St SE. This is a segment the overall project ID 5501.

Location / Facility:	From:	To:
Parallel to the South Side of I-90	142nd Pl SE	I-90 Overcrossing at 150th Ave SE
County:	Completion Year:	Prioritization Score:
King County	2026	

Sponsor: **BELLEVUE**
Project ID: **5502**
Title: **West Lake Sammamish Pkwy and Path Improvements**

MTP Status: **Candidate**
Estimated Cost: **$72,855,613**

Description:
Construct a ten foot multi-use path on the west side of the parkway and a four foot bike shoulder on the east side. Portions of the west side path will be separated from the vehicle travel lanes by two to five foot landscape planting. The project will include multiple mid-block pedestrian crossings and intersection improvements, and rehabilitation of existing pavement throughout the corridor. This project will be phased.

Location / Facility:	From:	To:
West Lake Sammamish Parkway	North City Limit	I-90
County:	**Completion Year:**	**Prioritization Score:**
King County	2040	43

Sponsor: **BONNEY LAKE**
Project ID: **5549**
Title: **Fennel Creek Trail**

MTP Status: **Candidate**
Estimated Cost: **$33,322,941**

Description:
Fennel Creek Trail ten foot wide ADA-accessible multi-use trail featuring facilities for pedestrians and bicyclists located within its own right-of-way. The Fennel Creek Trail will provide interconnectivity among Allan Yorke Park, Victor Falls Park, Lake Tapps, Downtown Bonney Lake, the Midtown Commercial District, the Sound Transit Park and Ride, Victor Falls Elementary, Mountain View Junior High, Bonney Lake High School, and surrounding residential neighborhoods. The trail will eventually provide a connection to the Foothills Trail and the proposed Flume Trail.

Location / Facility:	From:	To:
NA	Rhodes Lake Rd	214th Avenue East
County:	**Completion Year:**	**Prioritization Score:**
Pierce County	2030	23

Sponsor: **BOTHELL**
Project ID: **4262**
Title: **Bothell Way NE / Bothell-Everett Hwy Improvements**

MTP Status: **Approved**
Estimated Cost: **$55,729,110**

Description:
The project consists of widening Bothell Way NE from 2/3 lanes to 5 lanes, including signal improvements, protected bicycle lanes, sidewalks, retaining walls, storm drainage, utility work, illumination, ITS and adaptive signalization, landscaping and wetland mitigation. This project includes the PE for all segments, ROW for all segments, and Construction for segments 1 (NE 191st Street to Reder Way) and segment 2 (240th Street SE to County Line). Construction for segment 3 (NE 191st Street to County Line) is included in ID 5899.

Location / Facility:	From:	To:
Bothell Way NE / Bothell-Everett Highway	Reder Way	240th St SE
County:	**Completion Year:**	**Prioritization Score:**
King County	2030	74

Sponsor: **BOTHELL**
Project ID: **5899**
Title: **Bothell Way NE / Bothell-Everett Hwy Improvements - Segment 2**

MTP Status: **ROW Conditionally Ap**
Estimated Cost: **$42,729,187**

Description:
This project will widen Bothell Way NE between NE 191st Street and the King/ Snohomish County line to five lanes, and includes signal improvements, protected bicycle lanes, sidewalks, retaining walls, storm drainage, utility work, illumination, Intelligent Transportation Systems (ITS) and adaptive signalization, landscaping, and wetland mitigation. This project includes the construction of segment 3 (NE 191st Street to the County line) of the larger investment, Bothell Way NE Multimodal Improvements (ID 4262).

Location / Facility:	From:	To:
Bothell Way NE	NE 191st Street	County Line
County:	**Completion Year:**	**Prioritization Score:**
King County	2030	

Sponsor: **BOTHELL**
Project ID: **5537**
Title: **SR 522 - Stage 2b Transit Improvements**

MTP Status: **ROW Conditionally Ap**
Estimated Cost: **$24,586,000**

Description:
This project will provide transit improvements on SR 522 from approximately 1600-ft west of 98th Ave NE to 98th Ave NE. These improvements will provide a center dedicated eastbound transit lane to facilitate transit left turns onto 98th Ave NE. The project could also install queue jumps to allow transit to efficiently move through the corridor at intersections. The project also includes installation of curb, gutter, drainage, landscape strip, sidewalk, and lighting along the eastbound side of the highway. The project is currently a Sound Transit project that would be funded by Sound Transit 3 funds. The project scope, budget, and timeline are dependent on Sound Transit's allocation of funds.

Location / Facility:	From:	To:
SR 522	1600-ft west of 98th Avenue NE	98th Avenue NE
County:	Completion Year:	Prioritization Score:
King County	2025	61

Sponsor: **BOTHELL**
Project ID: **4254**
Title: **SR 522, Stage 3**

MTP Status: **Candidate**
Estimated Cost: **$39,638,144**

Description:
The proposed project will provide corridor continuity, improve traffic flow (capacity), provide continuous westbound and eastbound BAT (Business Access and Transit) lanes and provide a continuous ADA pedestrian facility.

Location / Facility:	From:	To:
SR 522	83rd Ave NE	91st Ave NE
County:	Completion Year:	Prioritization Score:

Title: **Swift BRT Orange Line - 164th Street & 196th Street Corridors**

MTP Status: **Approved**
Estimated Cost: **$80,323,602**

Description:
Swift Orange Bus Rapid Transit (BRT) will be Community Transit's 3rd BRT line and run in the 164th/196th Street Corridors between two terminals adjacent to McCollum Park & Ride in Everett and Edmonds Community College. The Orange Line will include approximately 13 station pairs (26 individual stations) along an 11.5 mile corridor that will connect to our Blue and Green BRT Lines, Sound Transit's Link light rail and Stride I-405 BRT. The project also includes priority treatments for speed and reliability along the corridor. Service will begin in 2024 with 13 BRT branded, 60-ft buses. Service will be provided to the Lynnwood Regional Growth Center, two locally designated centers and four park and ride facilities with all day, bi-directional service operating at 10 minute frequency during peak hours. A total of 42,500 annual service are planned.

Title: **SR 516 - Jenkins Creek to 185th Place SE**

MTP Status: **Candidate**
Estimated Cost: **$20,390,673**

Description:
This project is to widen and reconstruct a portion of SR 516 (SE 272nd St) between Jenkins Creek and 185th Place SE. This project will include the crossing of Jenkins Creek with a new structure for the stream, widening the street from 2-lanes to 5-lanes including curb and gutter, 8` sidewalks, access control features, landscaping and provisions for u-turns.

Sponsor: **DUPONT**
Project ID: **296**
Title: **DuPont-Steilacoom Rd**

MTP Status: **Candidate**
Estimated Cost: **$4,594,527**

Description:
Widening Improvements to DuPont-Steilacoom Rd are anticipated to be necessary to accommodate expected growth in the City of DuPont and increased traffic flows from nearby areas, such as Joint Base Lewis McChord (JBLM). The existing road is two lanes with left turn pockets onto the I-5 Exit 119 Interchange (which has been identified in various corridor studies for recommended improvements.) This project will support the present improvements of the I-5/JBLM Corridor and the associated I-5 Exit 119. After the completion of the WSDOT Corridor project, its associated I-5 Exit 119 connects to DuPont-Steilacoom Road. The project is to widen DuPont-Steilacoom Road by adding a new lane in each direction from Wharf Road to Barksdale Avenue. DuPont-Steilacoom Road consists of a 3 lane roadway section with two through lanes and a two way left turn lane in the center. The roadway is bordered by JBLM along the east side, with residential and open spaces along the west side. The proposed conditions will add an additional travel lane in each direction and rehabilitate the existing roadway. The additional lanes will: 1) Allow higher volumes of traffic to access both JBLM and the commercial and residential areas of DuPont; and 2) Reduce the congestion at other access points to these same locations served by I-5. The signal at Center Drive and DuPont-Steilacoom Road will be upgraded to accommodate the additional lanes. This project will build a new sidewalk, curb, and gutter where one does not exist. It will connect a residential neighborhood to adjacent retail area along DuPont-Steilacoom Road.

Location / Facility:	From:	To:
DuPont-Steilacoom Rd	Pendleton Avenue	Wharf Road

Title: **62nd Ave Pedestrian Bridge Over Interstate - 5**

MTP Status: **Unprogrammed**
Estimated Cost: **$24,602,975**

Description:
Sound Transit's System Access Fund will provide the preliminary design and engineering of the pedestrian and bicycle bridge overcrossing Interstate 5 (I-5) between Pacific Highway E and 20th Street E along 62nd Avenue East. The stated purpose of the project is "to improve safety and reliability of non-vehicular access to the Sound Transit Station and local and area businesses; while balancing effects to the natural and community environments." This bridge, fully accessible and designed for all ages and abilities, will be a vital connection between large numbers of potential transit users, the existing Pierce Transit Routes 500 and 501, and the future Sound Transit light rail station in Fife. The 1,300 foot bridge will include two primary spans across approximately 260 feet of I-5 northbound and southbound traffic lanes located within the WSDOT right of way. The bridge and will be designed to provide a 16' wide multiuse pathway to allow non-vehicular users to safely travel across Interstate 5.

Title: I-5 Regional Trail

MTP Status: Unprogrammed
Estimated Cost: $20,439,132

Description:
Development of light rail on the west edge if Kent creates the opportunity to develop a multimodal network designed to increase access to high capacity transit. Kent is exploring the possibility of building a multi-use trail running parallel to the light rail alignment, I-5, and SR 99 through Kent. The trail would be located between SR 99 and I-5 from Kent-Des Moines Road to S 272nd Street. It would enhance pedestrian and cyclist access to the soon to open Kent-Des Moines light rail station and Star Lake light rails station, as well as connect existing and planned high density housing, local east-west streets, and parks. The north-south trail is a critical regional connection similar to the Interurban Trail that transverses Kent's industrial/manufacturing center. The I-5 Regional Trail is anticipated to connect to future trails from south of the Kent. Kent anticipates launching an outreach effort to understand the needs and preferences of residents and businesses on Kent's West Hill as well as an outreach effort focused on stakeholders and adjacent cities. The outreach effort will result in a report summarizing the key findings and recommendations, documents the process, and includes the preferred trail alignment plan, cross sections, and cost estimate.

Estimated Cost: **$56,870,896**

Description:
Design and construct new paved regional trail segments between Enumclaw and Kanaskat.

Location / Facility:	From:	To:
Abandoned railway corridor.	Chinook Avenue, Enumclaw.	Retreat-Kanaskat Road, Kanaskat.

County:	Completion Year:	Prioritization Score:
King County	2045	28

Sponsor: **KING COUNTY DEPT. OF TRANSPORTATION (ROADS)**
Project ID: **4603**
Title: **Foothills Trail (South) and White River Bridge**

MTP Status: **Approved**
Estimated Cost: **$24,234,866**

Description:
Develop a 1.2 mile-long paved regional trail segment and bridge between the cities of Enumclaw and Buckley through Unincorporated King County. The project will link the southern terminus of the existing Foothills Trail in Enumclaw and 252nd Avenue SE to the northern terminus of the existing Foothills Trail at the City of Buckley. The project is being implemented in two sequential segments: Segment A from 252nd Avenue SE to Boise Creek Bridge at Mud Mountain Road and Segment B from Boise Creek Bridge to Buckley, including White River Bridge.

Location / Facility:	From:	To:
Regional trail corridor- former rail corridor	252nd Avenue SE, Enumclaw	Foothills Trail Corridor, Buckley, WA

County:	Completion Year:	Prioritization Score:
King County	2025	43

Sponsor: **KING COUNTY DEPT. OF TRANSPORTATION (ROADS)**
Project ID: **4032**
Title: **Green River Trail - North**

MTP Status: **Candidate**
Estimated Cost: **$22,283,586**

Description:
Continues Green River Trail north from current terminus at S. 102nd Street to Seattle City Limits. Acquisition, design, and construction of a paved regional trail.

Location / Facility:	From:	To:
Adjacent to or within ROW of West Marginal Place	North Terminus of Green River Trail at S. 102nd Street	Seattle City boundary

County:	Completion Year:	Prioritization Score:
King County	2025	34

Sponsor: **KING COUNTY DEPT. OF TRANSPORTATION (ROADS)**
Project ID: **4034**
Title: **Green River Trail - Phase 3**

MTP Status: **Candidate**
Estimated Cost: **$22,283,586**

Description:
Design and construction of paved regional trail link between cities of Kent and Auburn.

Location / Facility:	From:	To:
Off-road	Green River Trail near 86th Avenue S. - Kent	Brannan Park (Auburn)

County:	Completion Year:	Prioritization Score:
King County	2035	30

Sponsor: **KING COUNTY DEPT. OF TRANSPORTATION (ROADS)**
Project ID: **4035**
Title: **Green River Trail - Phase 4**

MTP Status: **Candidate**
Estimated Cost: **$22,283,586**

Description:
Acquisition, design, permitting, and construction of paved regional trail

Location / Facility:	From:	To:
Off road alignment between Brannon Park and SR18	Brannan Park (Auburn)	SR-18

County:	Completion Year:	Prioritization Score:
King County	2040	35

Sponsor: **KING COUNTY DEPT. OF TRANSPORTATION (ROADS)**
Project ID: **4606**
Title: **Green River Trail Phase 5 (Upper)**

MTP Status: **Unprogrammed**
Estimated Cost: **$35,891,430**

Description:
Develop paved regional trail along Green River from SR18 to Green-to-Cedar Rivers Trail near Flaming Geyser State Park.

Location / Facility:	From:	To:
Dedicated trail right-of-way along Green River and SE Green Valley Road.	SR18.	SE Green Valley Road near 227th Avenue SE at Flaming Geyser State Park.

County:	Completion Year:	Prioritization Score:
King County	2045	26

Sponsor: KING COUNTY DEPT. OF TRANSPORTATION (ROADS)
Project ID: 4607
Title: Green-to-Cedar Rivers Trail

MTP Status: Candidate
Estimated Cost: $80,720,266

Description:
Design and construct paved regional trail between existing interim trail terminus at Cedar River Trail in Maple Valley to Green River Trail at SE Green Valley Road.

Location / Facility:	From:	To:
Dedicated trail right-of-way.	Cedar River Trail, Maple Valley	SE Green Valley Road near 227th Avenue SE.

Title: ID# 1009: Bothell to UW via Kenmore

MTP Status: Candidate
Estimated Cost: $119,912,100

Description:
Construct a new RapidRide line connecting Bothell with the University of Washington. This project will improve the attractiveness of transit in a congested and physically constrained corridor. This project will include the following elements: New transit only or BAT lanes on existing or new right of way along the proposed routing to maintain high transit travel speeds; Major intersection investments at priority intersections to improve traffic flow, transit reliability and increase transit speeds; New transit signal priority at many of the signalized intersections along the route; upgraded passenger amenities with better information and passenger safety to facilitate greater transit use and remove barriers of existing use by building RapidRide stations, Enhanced RapidRide stops, and standard RapidRide stops. This project will connect the University of Washington Regional Growth Center with the UW Bothell campus and all the North Shore communities in between including Bothell, Kenmore, Lake Forest Park, Lake City, Wedgwood and Ravena. It also increases access to other regional transit services including the I-405 BRT at NE 195th St and Link Light Rail at the University of Washington Station.

Location / Facility:	From:	To:
Bothell to the University of Washington via SR 522 and 25th Ave NE	Bothell	UW
County:	**Completion Year:**	**Prioritization Score:**
King County	2050	55

Sponsor: KING COUNTY DEPT. OF TRANSPORTATION (ROADS)

MTP Status: Candidate

Project ID: 5733

Estimated Cost: $33,141,180

Title: ID# 1028/3101: Crossroads Bellevue U District

Description:

Create a new RapidRide line by modifying the existing B Line and extending it west to the University of Washington. This project will include the following elements: New transit only or BAT lanes on existing or new right of way along the proposed routing to maintain high transit travel speed; Major intersection investments at priority intersections to improve traffic flow, transit reliability and increase transit speeds; New transit signal priority at many of the signalized intersections along the route; upgraded passenger amenities with better information and passenger safety to facilitate greater transit use and remove barriers of existing use by building RapidRide stations, Enhanced RapidRide stops, and standard RapidRide stops. This project will connect two Regional Growth Centers, Bellevue and University District, along with other jobs and amenities in Crossroads and the growing Bel-Red district. It also increases access to other regional transit services including Link Light Rail in Bellevue and the University of Washington.

Location / Facility:	From:	To:
Crossroads to U District (NE 8th St, 84th Ave NE, SR 520)	Crossroads	U District

County:	Completion Year:	Prioritization Score:
King County	2036	40

Sponsor: KING COUNTY DEPT. OF TRANSPORTATION (ROADS)

MTP Status: Approved

Project ID: 5673

Estimated Cost: $80,355,163

Title: ID# 1041 - RapidRide H Line

Description:

Construct a new RapidRide line connecting Burien to Downtown Seattle via Delridge Way. This project would improve the attractiveness of transit between two Regional Growth Centers and include the following elements: New transit only or BAT lanes on existing or new right of way along the proposed routing to maintain high transit travel speeds; Major intersection investments at priority intersections to improve traffic flow, transit reliability and increase transit speeds; New transit signal priority at many of the signalized intersections along the route; upgraded passenger amenities with better information and passenger safety to facilitate greater transit use and remove barriers of existing use by building RapidRide stations, Enhanced RapidRide stops, and standard RapidRide stops. This project will connect the two Regional Growth Centers, Burien and Downtown Seattle, along with other jobs and amenities in downtown Seattle. It also increases access to other regional transit services including Link Light Rail in downtown Seattle I-405 BRT in Burien. Additionally, the project will enhance bicycle and pedestrian access to transit.

Location / Facility:	From:	To:
Burien Transit Center to Downtown Seattle via Delridge way	Burien	Seattle

County:	Completion Year:	Prioritization Score:
King County	2022	59

Title: Eastrail Wilburton Trestle Project

MTP Status: Approved
Estimated Cost: $36,340,782

Description:
Retrofit existing rail trestle and build a regional trail from approximately I-405 to SE 5th St. Project components include repairing and retrofitting the existing rail trestle with a new deck and handrail system, building access ramps to the trestle, paving the trail corridor, constructing an interim gravel parking area, constructing associated stormwater facilities, lighting, and providing mitigation for streams, wetland, and buffer impacts. The project will be constructed in phases and is a portion of the broader Eastrail (East Side Rail Corridor Trail) investment included in the Regional Transportation Plan, which extends from Renton to Woodinville-Redmond Rd.

Title: RapidRide I Line

MTP Status: Approved
Estimated Cost: $147,498,041

Description:
Construct the new RapidRide I Line connecting the downtown centers of Renton, Kent, and Auburn via Talbot Rd, SR 515, SR 516, and Central Ave/83rd Ave/Auburn Way. This project would improve the attractiveness of transit, improve mobility and access to opportunities, increase ridership, and reduce greenhouse emission.

Location / Facility:	From:	To:
Renton to Auburn via Rainer Ave S, Talbot Rd S, 108th Ave SE, Canyon Dr, and Auburn Way	Renton	Auburn

Title: **100th Ave NE Roadway Design & Improvements**

MTP Status: **Candidate**
Estimated Cost: **$11,743,622**

Description:
Construction of 100th Ave NE to address roadway improvements that will address the current 5-lane to 2-lane transition. The ultimate project will, at minimum, provide for bicycle lanes, an additional center turn lane where appropriate, sidewalks, curb and gutter, traffic signal and illumination improvements and storm drainage system upgrades. The project may also provide for a new fish passable culvert at the crossing of a Juanita Creek tributary if deemed necessary. The current budget does not include an amount for property acquisition as a property needs determination will be made during the design phase.

Location / Facility:	From:	To:

Title: **124th Ave NE Roadway Improvements (South)**

MTP Status: **Candidate**
Estimated Cost: **$30,095,568**

Description:
Widen approximately 1.8 miles of roadway from the existing 2-lane configuration to one with a center two-way left turn lane (including landscaped center median islands where possible) and 2 travel lanes. The project will also provide six-foot sidewalks along the west and east side of the roadway. Acquisition of private property along the alignment will be required to allow the 80` wide cross section.

Title: **SR 104 Realignment - Kingston**

MTP Status: **Candidate**
Estimated Cost: **$9,384,663**

Description:
Re-align SR104 to move the inbound ferry traffic to the north couplet (NE 1st Street). The project will include sidewalks where appropriate, ferry toll booth relocation, storm water, illumination, signals, and street amenities. The project will add two inbound travel lanes on 1st Street and remove two travel lanes on Main Street, restoring Main Street to two-lane, two-way local circulation between Washington Blvd and W. Kingston Rd/Iowa Avenue. Bicycle lanes in both directions will be added to Main Street with the outbound bike lane diverting to 1st Street at Iowa Avenue.

Title: Fast Ferry Docking Facility - Seattle

MTP Status: Candidate
Estimated Cost: $95,929,680

Description:
Design and Construct a new fast ferry docking facility in downtown Seattle. Minimum 4 berths, passenger facility uplands, bicycle storage and electric vessel infrastructure. The concept is to locate the facility in a place that has room to grow into a regional facility once other jurisdictions embrace fast ferry services. Kitsap Transit is in the alternatives analysis/site location process and expect to move to ROW acquisition within the next 3 years. Preliminary Engineering, Environmental work and Construction to follow.

Title: Scriber Creek Trail

MTP Status: Candidate
Estimated Cost: $45,440,375

Description:
The City of Lynnwood is proposing to improve the Scriber Creek Trail to provide a shared use/multi-modal trail. The full scope of this project converts approximately three miles of mixed condition (walking paths, sidewalks, undeveloped right-of-way, asphalt trail) into a non-motorized transportation connection from the regional Interurban Trail (at the south end) to the City's Lund's Gulch Open Space (the north end). The proposed trail is designed as accessible, shared-use infrastructure with hard surfaces. Portions of the trail at-grade will be constructed with hard surfaces. Where necessary in wetland areas, the trail will be constructed on elevated boardwalk, and at stream crossings bridges will be installed. At street crossings, each of the crossings will be enhanced with improved channelization, signage, lighting and ADA curb ramps. A short segment of the trail will be a separated shared-use facility along the south side of 200th Street SW. This project will be implemented in phases. The first segment planned for construction is approximately one mile from the Interurban to Wilcox Park and is currently in design and permitting.

Title: **Canyon Rd. E., 208th St. E. to 200th St. E.**

MTP Status: **Approved**
Estimated Cost: **$14,551,018**

Description:
This project will construct a new roadway with one travel lane in each direction and a two way left turn lane. The western half of the roadway will include paved shoulder, curb, gutter, and sidewalk. The eastern half of the roadway will have a paved and/or gravel shoulder with geometrics designed to accommodate a future project that will widen the roadway to five lanes. Other improvements include illumination, enclosed stormwater system, a realigned intersection and improved traffic signal at 200th St. E., and a new traffic signal at 208th St. E.

Title: Canyon Rd. E., 52nd St. E./62nd Ave. E. to 70th Ave. E.

MTP Status: Candidate
Estimated Cost: $195,088,359

Description:
The Canyon Rd. E. freight corridor will connect the Frederickson Manufacturing Industrial Center with the Port of Tacoma and destinations northward (e.g. Seattle). This project will extend Canyon Rd. E. from the intersection of 52nd St. E./62nd Ave. E. to 70th Ave. E., with two through lanes in each direction and left-turn lanes where appropriate. The project will remove the functionally obsolete Milroy Bridge and construct a grade-separated span over River Rd. (SR 167), the Puyallup River, and North Levee Rd. E. on a new alignment approximately 1,400 feet upriver. Non-motorized facilities will include paved curb, gutter, and sidewalk, separated paths beside the bridge approaches, and a shared-use path suspended beneath the new bridge over the Puyallup River. A second, smaller bridge will extend Canyon Rd. E. over Clarks Creek. The project will include several traffic signal improvements, illumination, and storm drainage facilities.

Title: Canyon Rd. E., Pioneer Way E. to 52nd St. E./62nd Ave. E.

MTP Status: ROW Conditionally Ap
Estimated Cost: $97,544,179

Description:
The Canyon Rd. E. freight corridor will connect the Frederickson Manufacturing Industrial Center with the Port of Tacoma and destinations northward (e.g. Seattle). The work for this project will include widening and new road construction to provide four through lanes, realignment and signal reconstruction at the Pioneer Way E. intersection, an overcrossing of the BNSF Railroad mainline tracks, and closure of the 52nd St. E. at-grade rail crossing. The roadway will include illumination, nonmotorized facilities (widened curb lanes and curb, gutter and sidewalk), and stormwater collection and treatment. The project also includes new fish-passable stream culverts, stream improvements, and wetland mitigation.

Title: Canyon Road Freight Corridor Improvements, 84th St E to 72nd St E

MTP Status: Approved
Estimated Cost: $14,803,464

Description:
Canyon Road Freight Corridor Improvements connects the planned employment center in Fredrickson with the Port of Tacoma and destinations northward (e.g. Seattle). The improvements to the major arterial roadway will result in a four-lane roadway plus a two way left turn lane, additional turn lanes at intersections, reconstruct one existing traffic signal system, install a new traffic signal system, upgrade the existing copper aerial traffic signal interconnect system to an underground fiber optic system, add paved shoulders (to accommodate non-motorized modes) and concrete sidewalks.

Title: BRT: Pacific Avenue S/SR 7 Corridor from Downtown Tacoma to Spanaway

MTP Status: Candidate
Estimated Cost: $171,663,638

Description:
New Bus Rapid Transit service on Pacific Avenue S/SR 7 from downtown Tacoma to Spanaway (14.4-mile corridor). This route was identified in the Transit Competitive Index and is a Pierce County Congested Corridor. In 2015, Route 1, which operates in the same corridor, had 1.7 million boardings out of 9.1 million system-wide (i.e., 19 percent of the entire fixed route network`s boardings in 2015). Route 1 recorded 27.3 passengers per service hour in 2015; the highest ranking of the trunk routes. Based on existing ridership plus population and employment densities, an initial conversation with the FTA confirmed that the Pacific Avenue/SR 7 corridor is an ideal candidate to evaluate for a BRT system. Therefore, Pierce Transit currently has a High Capacity Transit Feasibility Study underway and assumes that BRT will be the Locally Preferred Alternative (LPA).

Title: HCT: Route 3 Corridor - Downtown Tacoma to Lakewood Transit Center

MTP Status: Unprogrammed
Estimated Cost: $141,370,055

Description:
HCT, BRT, enhanced bus, or limited stop bus service in the 11.3-mile corridor from Downtown Tacoma (10th & Commerce Streets) to the Lakewood Towne Center Transit Center currently served by Route 3. Route 3 operates between Lakewood TC and Commerce Street Transit Area, stair stepping northeast along 59th Avenue, Steilacoom Boulevard, Tacoma Way, 74th Street, Oakes Street, Pine Street, Center Street, and Tacoma Avenue. Destinations served include Clover Park Technical College and Tacoma Mall. With respect to alignment, Route 3 will be revised to create a more direct, faster route between downtown Tacoma, Tacoma Mall, SR-512 Park-and-Ride, and Lakewood Transit Center via South Tacoma Way and 108th Street SW. This will provide more service along major arterials and help enhance regional mobility by improving better access between key destinations. The corridor is also identified in the Sound Transit 3 (ST3) plan as a potential BRT corridor.

Title: HCT: Route 4 Corridor Lakewood to Puyallup

MTP Status: Unprogrammed
Estimated Cost: $161,565,777

Description:
Pierce Transit's Route 4 went into service in June 2015 when the Routes 204 and 410 were combined into one. Since that time, Route 4 continues to be one of Pierce Transit's most productive. The proposed project, once constructed, would finalize the agency's vision of upgrading all four Pierce Transit trunk routes to Bus Rapid Transit within the next 10 to 15 years. Once constructed, the fifth (and likely final) Stream BRT route will connect two Regional Growth Centers (Lakewood and Puyallup South Hill). The proposed project will be analyzed as part of the Stream BRT System Expansion Study to commence in mid-2021.

Location / Facility:	From:	To:

Project ID: **2596**
Title: **South Hill:Meridian Avenue E/SR 161 Park-and-Ride**

MTP Status: **Unprogrammed**
Estimated Cost: **$16,302,768**

Description:
The project will build a new 350-space Park-and-Ride and bus turnaround facility with improved bicycle and pedestrian access for northbound travelers in the Meridian Avenue E Corridor (SR 161). Replaces a Route 402 bus pullout and single shelter at the south end of the service area in South Hill that is currently operating over capacity. The proposed Park-and-Ride project will also provide multiple bus shelters and other passenger amenities, plus an operator comfort station and passenger safety and security improvements where none exist today.By providing improved drop off or Kiss-and-Ride facilities at this location, Pierce Transit can set the foundation for even more frequent and direct service from the southeastern end of the county into Downtown Tacoma, a designated regional growth center. Constructing a full service passenger and operator facility at this location will create a hub for higher capacity, limited stop, or Bus Rapid Transit service in the future.

Location / Facility:	From:	To:
South Hill Park-and-Ride	Meridian Avenue E/SR 161	176th Street E/Sunrise Blvd. E

Title: **Spanaway Transit Center**

MTP Status: **Candidate**
Estimated Cost: **$18,500,000**

Description:
The scope of the project constructs a new transit facility in Spanaway, Washington, at the south end of Pierce Transit's service area boundary. The new facility will include a bus loading and unloading area, a transit user parking lot with room for 250 vehicles, secure bicycle parking for active transportation connections, a comfort station for bus operators, and a passenger drop-off area. Associated work includes constructing an onsite sewer system, extending electric and water service, and installing site landscaping and security lighting, sidewalks, curb ramps, and possibly install electric vehicle (EV) charging infrastructure on-site.

Title: Shaw Road Widening- Phase 4 (12th to 23rd) Project ID 494

MTP Status: Candidate

Estimated Cost: $40,391,444

Description:

The ultimate project is to widen the stretch of Shaw Road, a principal arterial, from 12th Ave SE to 23rd Ave SE. There are a variety of complex issues for this length section of Shaw; 1) the vertical challenges, 2) the horizontal challenges, 3) the environmental issue with a fish bearing stream that crosses the road multiple times, 4)hydrologic issues with the ground water seepage from the slopes, and 5) numerous individual driveways entering a Major Arterial. Initial evaluation of this stretch of Shaw is underway in order to determine alignment, lane configuration, multimodal accommodation, and public outreach.

Project ID: 3476
Title: Avondale Rd/Union Hill Rd Intersection 3476

MTP Status: Candidate
Estimated Cost: $57,729,850

Description:
Study and design solutions for this heavily congested at-grade intersection. Develop a preliminary design to determine which option listed below should be pursued. Estimated cost for the preliminary design work is $3 million. Solutions to study include:1. Grade separation of critical movements such as: - Westbound Union Hill Rd to Southbound SR 520 left turn, or - Northbound and southbound through movements between SR 520 and Avondale Rd., or - All left turns at intersection.2. Flyover Ramp: This option would provide a fyover ramp from westbound Union Hill Road to westbound SR 520. To accommodate this fyover from the center of Union Hill Road to the center of SR 520, it would be necessary to widen both roadways, modify the NE 76th Street ramps, build retaining walls and potentially require additional right of way.

Title: Sahalee Way NE Capacity Improvements

MTP Status: Candidate
Estimated Cost: $105,261,530

Description:
Widen Sahalee Way NE to three lanes with median or two-way left turn lane, buffered bike lanes, curb, gutter and sidewalk from NE 12th Way to NE 36th Street. From NE 36th Street to NE 37th Street, widen to a five lane cross-section. From NE 37th Street to North City Limits, widen to a four lane cross-section with median. This includes the possibility of adding “climbing” lane as needed. Paired with this project are multiple intersection improvements, including the installation of a signal at the Sahalee Way and NE 28th Place intersection, a possible by-pass lane at the Sahalee Way and NE 37th Street intersection, and improving sight distance at the Sahalee Way and NE 36th Street intersection.

Project ID: 5768
Title: Aurora Avenue Corridor Improvement Project

MTP Status: Candidate
Estimated Cost: $425,000,000

Description:
Enhance safety and efficiency for active transportation users, freight operations and transit services, including the RapidRide E Line in partnership with King County Metro, with multi-modal capital improvements along a 7.6 mile segment of the SR99/Aurora Ave N corridor between Harrison St and N 145th St. This project will explore capacity reduction along the entire corridor alongside additional speed and reliability measures, roadway reconstruction, ITS and safety improvements and pedestrian, bike and freight improvements. Project elements being evaluated for inclusion throughout the corridor include new and upgraded sidewalks, new traffic signals at priority intersections, upgraded pedestrian crossings, new roadway and pedestrian-scale lighting, lane reconfigurations, street trees and landscaping, new medians and access management. Pending further analysis and planning, final design could also potentially include lane conversions that reduce vehicular capacity along the principal arterial corridor to accommodate new or expanded BAT lanes and/or separated bicycle facilities, such as protected bike lanes. The project will also require upgrades to the existing undersized drainage system within the Densmore Drainage Basin to improve the management of stormwater runoff on the corridor and prevent flooding within the drainage basin. Required drainage upgrade costs, cost-share and scope details are still being defined and will be addressed separately in partnership with Seattle Public Utilities.

Title: Central Waterfront Project - Alaskan Way, Promenade and Overlook Walk

MTP Status: ROW Conditionally Ap
Estimated Cost: $704,585,777

Description:
This project includes the reconstruction of the Alaskan Way surface street, construction/reconstruction of Elliott Way/Western Ave between Pike Street and Battery Street, reconstruction of Seneca and Columbia Streets between the Waterfront and First Avenue, a new Pine Street connection between Alaskan Way and Elliott Way, and reconstruction of the Lenora and Marion Pedestrian Bridges. As part of the reconstruction of Alaskan Way the roject provides a new separated bicycle lane, drainage systems, improved signals, lighting, intersections and sidewalk and ADA improvements. The project also builds a new wide pedestrian thoroughfare (the Promenade) within the existing ROW. In addition, as part of the project Seattle is improving east-west streets in Pioneer Square, Bell Street and Pike and Pine Streets. A new pedestrian bridge at Union Street and a new pedestrian connection and public open space between Pike Place Market and Alaskan Way over Elliott Way similar to the Olympic Sculpture Park, the overlook Walk, will also be constructed. Reconstruction of historic piers and replacement of the old Washington Street Boat Landing Pergola are also part of the program. Public and private utilities will also be relocated as part of this project. The City of Seattle and WSDOT are key financial partners on this project.

Title: NE 130th St Station: Corridor Access & Safety Improvements

MTP Status: Candidate
Estimated Cost: $18,000,000

Description:
The project will provide areawide multimodal transit access and safety improvements around the NE 130th St light rail station. The project includes a phased series of planned and potential lane reconfigurations on select roadway segments to calm traffic and improve safety along the corridor. Lane conversions will impact roadway capacity along this principal arterial to accommodate enhanced bike facilities and in-lane bus stops. Some of the roadway segments to be rechannelized are confirmed, along NE 130th and Roosevelt Way NE, while others will be evaluated for potential inclusion through the design process (along NE 125th). Safety measures and multimodal enhancements are also being evaluated, e.g., new and improved transit stops and amenities, pedestrian crossing improvements, signal improvements, bicycle facilities, etc.

Estimated Cost: $319,771,494

Description:
Make capital improvements to connect South Lake Union and First Hill Streetcar lines. Provide infrastructure and expand streetcar fleet to ensure good speed and reliability and access to stations. Capital improvements may include significant reassignments of roadway space plus transit vehicle rail and power delivery systems, bicycle and pedestrian facilities, urban design elements, ITS systems, way-finding, transit shelters, pavement upgrades and lighting.

Title: Seattle Central Business District ITS

MTP Status: Unprogrammed
Estimated Cost: $133,598,400

Description:
Enhance and expand management technologies to address congestion and to accommodate complex multimodal networks in the Central Business District. The project will incorporate real-time data collection, adaptive signal prioritization and control, transit signal priority, intelligent lane management, safety enhancements, incident and event management, wayfinding for people and goods delivery, parking and loading management, connected vehicle capacity (V2I), and system/communications resiliency.

Title: Seattle Transit Priority Lanes

MTP Status: Candidate
Estimated Cost: $24,288,501

Description:
Design and build transit priority travel lanes. Convert existing lanes or right-of-way into dedicated lanes, increase visibility and compliance, support with transit signal priority, capital construction, or other efforts as needed to improve transit travel times and reliability. Improvements are focused on transit lanes along Seattle's Frequent Transit Network where routes encounter significant delay, but may include transit-and-freight lanes, convertible lanes, and other lane conversions that maximize the usefulness of the right-of-way.

Title: Third Avenue Transit Spine

MTP Status: Candidate
Estimated Cost: $98,690,685

Description:
This project was previously identified as the southern segment of Priority Bus Corridor 8 (T2040 ID:5095). The Third Ave Corridor is also an integral part of Priority Bus Corridor 7 (T2040 ID 5164); RapidRide Corridors 2, 3, 6, and 7 (T2040 ID: 5087, 5165, 5141, 5152); and RapidRide C, D, and E (T2040 ID: 5097, 5091, 4092). The project includes investments to increase capacity, optimize operations, and improve the traveler experience for transit in this corridor. The project reconfigures the corridor to increase transit capacity and improve operations, expanded transit stops, and installations to improve the traveler experience. The project incorporates ITS, way-finding, traveler information systems, and electric trolley wire infrastructure. It also includes elements that support bus rapid transit such as dedicated running ways, transit signal priority features, and enhanced fare collection systems. Enhancements to improve access to transit may include pedestrian and bicycle access improvements and amenities such as secure and covered bike parking, digital kiosks, real-time information, lighting, and integrated access.

Title: Thomas Street Project

MTP Status: Candidate
Estimated Cost: $22,283,586

Description:
Establish Thomas Street as the principal connection between Seattle Center, Uptown and the South Lake Union urban villages through the construction of a multi-use pathway between the north sidewalk and the vehicle travel lanes. This revised cross section will utilize the Thomas Street right of way to prioritize safety for people walking, biking and using transit to connect with the dense employment and entertainment hubs in these urban villages. Safety will be enhanced through the construction of a protected intersection at Dexter Ave N and a separation of the bike facility from the streetcar tracks between Westlake Ave N and Terry Ave N. The citywide bicycle network will be knit together by connecting the north-south routes along Dexter Ave N and 9th Ave N to this east-west connection. The separated multi-use pathway will extend from 5th Ave N to Fairview Ave N, further connection to the Eastlake Ave N protected bike lane will be made using a combination of neighborhood greenway and protected bike lanes.

Location / Facility:	From:	To:
Thomas Street	5th Ave N	Fairview Ave N

Title: Westlake Multimodal Transportation Hub

MTP Status: Candidate
Estimated Cost: $26,655,414

Description:
Expand the multimodal hub area to accommodate increased transit service in Downtown and South Lake Union. Make improvements to improve transfer opportunities between transit and other modes, create clear routes and improved wayfinding, provide real-time transit rider information and maximize fare integration. Includes protected bike lane connections, enhanced street furniture, public art, enhanced pedestrian crossings, end-of-trip amenities like secure and covered bike parking, digital kiosks, integrated access amenities like passenger loading zones, dedicated car share stalls, and other multimodal connections. May include satellite access points.

Title: 148th Street Non-Motorized Bridge

MTP Status: Candidate
Estimated Cost: $30,501,529

Description:
I-5 forms a barrier for direct access to the Sound Transit Shoreline South/148th Station from westside neighborhoods. The 148th Street Non-Motorized Bridge project will design and construct a ped/bike bridge spanning I-5 and connecting to the north-end station plaza area. Improvements will include integration with the light rail station plaza area (east side of I-5) including ramps and stairs. West side landing improvements will include ramps and stairs. The project will analyze safe pedestrian and bicycle connections to 1st Ave NE and evaluate a drop-off/pick-up area ("kiss-n-ride").This project will be designed and constructed in two phases: 1) Phase 1 will include full project design (SL-25) and construction of the improvements on the east side of I-5 (SL-25A) 2) Phase 2 (SL-25B) will include right-of-way acquisition and construction of the improvements on the west side of the freeway, including the bridge superstructure.

Title: 15th Ave NE Corridor Improvement

MTP Status: Unprogrammed
Estimated Cost: $6,973,323

Description:
This project would construct sidewalks and accessible bus stops on the west side of the road from NE 180th St to NE 205th St. There are significant topographic challenges related to constructing a sidewalk on the west side of this arterial. A corridor study will be performed to identify a preferred transportation solution for this roadway segment. Alternatives to accommodate bicycles will be analyzed, including rechannelization of the roadway from four lanes to three. The cross-section of the road from NE 175th St to NE 180th St would be reduced from four lanes to three and bicycle lanes would be installed. Right-of-way may need to be purchased to complete this project. This project is currently unfunded and a specific year for funding is not known.

Title: Ballinger Way - NE 205th St to 19th Ave NE Access Control

MTP Status: Unprogrammed
Estimated Cost: $11,955,363

Description:
The primary goal of this project is to address significant collision history on this roadway by improving safety and mobility for all modes. This project would improve safety and mobility primarily by focusing on the following three components: 1) Access control - utilize median islands to limit turning movements, consolidate access points, and provide U-turn capability at intersections where applicable; 2) Pedestrian & bike facilities - improve nonmotorized facilities by widening the sidewalk, providing an amenity zone, implementing off-corridor bike facilities consistent with Transportation Master Plan, and providing safer midblock crossing opportunities; 3) Signalized intersections - improve signalized intersections and associated transit facilities by providing ADA compliant signal features, signal coordination and ITS, updated signal timing and phase changes, Transit Signal Priority/transit queue jumps, improved bus stops, and widening for U-turn capability. This project is located on a State Highway and would require coordination with the Washington State Department of Transportation (WSDOT). Impacts to Right of Way are anticipated to be minimal, primarily occurring at intersections.

Title: N 175th Street, Stone Avenue N to I-5

MTP Status: Candidate
Estimated Cost: $42,406,965

Description:
175th Street is considered a high priority as it is a primary access route to I-5, has relatively high levels of congestion, substandard sidewalks adjacent to an area with high pedestrian volumes next to elementary schools, a church with sizeable park-and-ride lot, bus stops, and a park. This project improves corridor safety and capacity, providing improvements which will tie in with those recently constructed by the Aurora project. Improvements include reconstruction of the existing street to provide two traffic lanes in each direction with medians and turn pockets; curb, gutter, and sidewalk with planter strip where feasible; bicycle lanes integrated into the sidewalks; illumination; landscaping; and retaining walls where required. Intersections with high accident rates will be improved as part of this project. Right-of-way and construction will likely proceed in the following phases:1. Stone to Wallingford2. 175th & Meridian intersection (Wallingford to Bagley)3. Bagley to I-5

Location / Facility:	From:	To:

Title: SR 523 (N/NE 145th St), Aurora Ave N to I-5, Phase 1 (I-5 to Corliss Ave)

MTP Status: Approved
Estimated Cost: $33,051,599

Description:
Project elements include signalized intersection improvements at 1st Ave N and signal timing adjustments, additional left-turn lanes, pedestrian signal at Corliss Ave N, improved sidewalks and crosswalks, pedestrian countdown signals, and Americans with Disabilities Act (ADA) accessible curb ramps. This project is a portion of the broader SR 523 (N/NE 145th St), Aurora Ave N to I-5 investment included in the Regional Transportation Plan, which extends east to Aurora Ave N.

Title: SR-523 (N/NE 145th Street) & I-5 Interchange

MTP Status: Approved
Estimated Cost: $32,470,073

Description:
Replace the signalized intersections with roundabouts at the westside I-5 on/off ramps and at 5th Ave on the east side of I-5. The roundabouts will eliminate the need for a center lane with left-turn pockets on the existing bridge deck and will allow reconfiguration of the bridge deck from a 5- lane to a 4-lane roadway. The space no longer required for the roadway will be repurposed as a shared pedestrian and bicycle path across the north side of the bridge, protected by raised curbs. The existing pedestrian walkway on the south side of the bridge will be retained.

Title: **Trail Along the Rail**

MTP Status: **Unprogrammed**
Estimated Cost: **$9,420,669**

Description:
This project will provide an approximately 2.5 mile multi-use trail that roughly parallels the Lynnwood Link Light Rail guideway from Shoreline South/145th Station through the Shoreline North/ 185th Station and to the 195th Street Pedestrian Overcrossing. It is anticipated that portions of the Trail Along the Rail will be built by Sound Transit and it is assumed that steps can be taken working with Sound Transit to ensure that the ability to complete the Trail Along the Rail in the future is not precluded. In order to be more competitive for funding and to better utilize development partnership opportunities, the project is anticipated to be constructed in segments as follows:Phase 1: NE 175th to NE 185th StPhase 2: Shoreline South/148th Station to N 155th StPhase 3: Shoreline North/185th Station to the NE 195th St Pedestrian Overcrossing Phase 4: N 155th St to NE 175th St

Location / Facility:	From:	To:
Located on the east side of I-5, the trail would run from N 145th Street to NE 195th Street	N 145th Street	NE 195th Street

Title: I-405 Bus Rapid Transit

MTP Status: Approved
Estimated Cost: $1,136,814,480

Description:
This project establishes Bus Rapid Transit (BRT) from the Lynnwood Transit Center to the Burien Transit Center via I-405 and SR 518. BRT service will utilize the I-405 express toll system and HOV lanes as nedeed, and will construct and utilize bus priority lanes and treatments along S. 154th Street, SR 518 and S. 148th Street between Tukwila/International Boulevard Station and Burien Transit Center. Project elements include: ten BRT stations; new/expanded parking facilities; interchange improvements to accomodate new/modified stations; station access improvements (including bus priority lanes and treatments along NE 85th Street in Kirkland). New stations include a transit center and parking facility (of +/- 700 spaces) in South Renton, an in-line station at I-405/Northeast 85th Street, and an in-line station (with +/- 200 spaces of parking) at I-405/NE 44th Street in Renton. The Kinggate P&R at Totem Lake will expand by +/- 400 spaces.

Title: Link LRT extension from downtown Seattle to Ballard

MTP Status: Candidate
Estimated Cost: $3,208,592,187

Description:
This project builds light rail from downtown Seattle to Ballard's Market Street area with a new rail-only subway through Seattle Center/Uptown and South Lake Union. The project will be constructed in conjunction with a new downtown Seattle light rail tunnel, which will extend from International District/Chinatown to the Denny Station. The Ballard to downtown Seattle project includes elevated light rail on 15th Avenue West and Elliott Avenue West and rail-only movable bridge over Salmon Bay. Five new stations serve the areas of South Lake Union, Seattle Center, Smith Cove, Interbay and Ballard.

Location / Facility:	From:	To:
Link LRT extension	South Lake Union	Ballard
County:	**Completion Year:**	**Prioritization Score:**
Pierce County	2039	62

Sponsor: SOUND TRANSIT

Title: Link LRT extension to South Kirkland and Issaquah

MTP Status: Candidate
Estimated Cost: $3,651,418,951

Description:
This project extends light rail from downtown Bellevue to south Kirkland and Issaquah, with new stations at South Kirkland Park-and-Ride, Richards Road (Factoria area), Eastgate area near Bellevue College, and central Issaquah, and a provisional station in the Lakemont area. Includes a new parking facility (+/- 500 spaces) and pedestrian bridge across I-90 at central Issaquah, and expansion of parking at South Kirkland (by +/- 230 spaces). Interlining with the existing system through downtown Bellevue will necessitate modifications to portions of guideway and some stations.

Location / Facility:	From:	To:

Title: NE 145th Street and SR 522 Bus Rapid Transit

MTP Status: Approved
Estimated Cost: $522,814,581

Description:
This project establishes Bus Rapid Transit (BRT) from the Link station at I-5 and Northeast 145th Street to UW Bothell, with service continuing at lower frequencies to Woodinville. On Northeast 145th Street, this project includes transit priority spot treatments to facilitate BRT movement through corridor bottlenecks. On SR 522 the majority of the corridor through Lake Forest Park, Kenmore and Bothell will feature Business Access Transit (BAT) lanes, with transit-supportive enhancements on arterials from downtown Bothell to UW Bothell. This project includes nine pairs of stations with additional parking (of +/- 300 spaces each) at Lake Forest Park, Kenmore and Bothell, and an expanded transit center at UW Bothell.

Location / Facility:	From:	To:
NE 145 St and SR 522 corridor	NE 145th St at I-5	UW Bothell Transit Center

Title: **I-405 Corridor: Renton to Bellevue Improvements**

MTP Status: **Approved**
Estimated Cost: **$847,750,166**

Description:
This project continues the widening of the I-405 corridor between Renton and Bellevue, including the implementation of Express Toll Lanes (ETL) and rebuilding impacted interchanges. Project improvements include the following: - The I-405 Renton to Bellevue ETL project will create a dual lane express toll lane system between SR 167 and NE 6th Street in Bellevue. The project will add one lane in both directions from the SR 167 interchange to the I-90 interchange, and add a northbound lane from the I-90 interchange to NE 6th Street. This new lane will be paired with the existing HOV lane to create the dual-lane express toll lane system. - Construct a transit/HOV direct access ramp at NE. 44th Street in Renton (MP 8.00) in coordination with Sound Transit. - Improve four interchanges: NE Park Drive, NE 44th Street, 112th Avenue SE, and Main Street. - Replace four bridges: I-405 over May Creek, NE 44th, 112th Avenue SE, and Main Street. - Construct one new bridge: southbound I-405 over Coal Creek Parkway. - Widen three existing bridges: Sunset Boulevard NE, NE Park Drive, and SE 8th Street. - Improve fish passage crossing barriers as identified through the environmental process; potentially two at Gypsy Creek, and at two unnamed streams near I-405 MP 7.80. - Construct a new pedestrian/bicycle path in areas where the existing Lake Washington Loop trail will be impacted. - This project will modify local roadways and pedestrian and bicycle facilities related to the interchange improvements and I-405 widening, install sign bridges, install ITS, install a toll system, install and/or replace noise walls, and construct storm water management facilities.

Title: **SR 509 Extension (with I-5), Phase 1**

MTP Status: **Approved**
Estimated Cost: **$859,179,837**

Description:
This project will construct a new four lane SR 509 from S. 188th St to its connection with I-5. The project will also construct a two lane southbound collector-distributor along I-5 to SR 516, reconstruct the SR 516 interchange into a diamond interchange and provide a connection to Veteran`s Drive. This project also constructs a NB Auxiliary lane between SR516/Veterans onramp and SR509 Off ramp. The project constructs a half diamond to the south to connect SR509 to 28/24th Ave S. Reconstruct the S 188th St Interchange into a half diamond to the north and construct a Southbound Auxiliary from SR516 down to S 272nd St.

Location / Facility:	From:	To:
SR 509	I-5	Existing SR 509
County:	**Completion Year:**	**Prioritization Score:**

Title: SR 9 @ SR 204 Intersection Improvements

MTP Status: Approved
Estimated Cost: $68,944,001

Description:
Improvements to the SR 9 and SR 204 intersection vicinity will be constructed in three stages and extend from SR 9 MP 15.12 to SR 9 MP 16.05. Stage I construction includes a new southbound through lane on SR 9 between Market Place and 4th Street SE. Stage I construction also converts the southbound right-turn pocket on SR 9 into a through between 4th Street NE and Market Place.
Stage II construction includes a new northbound through lane on SR 9 between Market Place and 4th Street NE, converting and extending the existing right-turn pocket on northbound SR 9 to a through lane between 4th Street SE and Market Place, right-turn pockets from westbound Market Place to northbound SR 9, from northbound SR 9 to 4th St NE and from southbound SR 9 to westbound Market Place.
Stage III construction includes two-lane roundabouts along SR 9 at the intersections of SR 204 and N Davies Road, and two mini roundabouts along Vernon Road at the intersections of 91st Avenue NE and N Davies Road. Other improvements include stormwater control, landscaping, signage, traffic control, pavement markings, lighting, and bicycle and pedestrian facilities.

Title: **I-5/ SR 512 Stage 1**

MTP Status: **Candidate**
Estimated Cost: **$57,100,421**

Description:
A high volume of westbound SR 512 morning traffic to northbound I-5 disrupts traffic flow on I-5 and causes large traffic back-ups on SR 512 between Steele Street Interchange and I-5 for both Truck and GP traffic. Additionally, a high volume of northbound I-5 traffic exiting to eastbound SR 512 in the afternoon causes large traffic back-ups between Bridgeport Way Interchange and SR 512 Interchange for both Truck and GP traffic. Widening the NB I-5 on ramp to two lanes and constructing an auxiliary lane on SR 512 from E Steele St, as well as widening the NB I-5 off ramp to SR 512 and adding an auxiliary lane, may reduce traffic congestion and increase traffic mobility.

Location / Facility:	From:	To:
I-5	SR 512 I/C	E Steele St.

Title: **I-5/DuPont-Steilacoom Rd to Thorne Ln - Corridor Improvements**

MTP Status: **Approved**
Estimated Cost: **$374,894,812**

Description:
This segment of I-5 experiences congestion and mobility problems due to high traffic volumes. This project will construct additional HOV lanes in both directions of I-5 between DuPontSteilacoom Road and Thorne Lane interchanges. The interchanges at Thorne Lane and Berkeley Street will be reconstructed as part of this project. When complete, this corridor will benefit from reduced congestion, enhanced freight mobility, improved safety and support economic growth.

Title: **SR 704/Cross Base Highway - New Alignment (Stage two)**

MTP Status: **Unprogrammed**
Estimated Cost: **$434,474,063**

Description:
The limited east-west access and circuitous nature of the existing routes results in poor transportation system linkage to the growing areas of mid-Pierce County and creates additional congestion on the existing east-west corridors of SR 512 north of McChord Air Force Base and SR 510 south of Fort Lewis in Thurston County. This project will construct a new alignment between the Thorne Lane interchange at I-5 and the intersection of 176th Street and SR 7 in Spanaway to improve transportation system linkage and capacity between mid-Pierce County and destinations along the I-5 corridor for the efficient movement of people and goods.

Location / Facility:	From:	To:
