Your Passport to Living in the Puget Sound Region
Welcome to your Passport to Living in the Puget Sound Region, a spectacular place festooned with snow capped mountains, a riot of diverse wildlife, a fiesta of local farm and forest products and a good dose of snappy smart people like you.

Collectively we are 3.7 million people and by 2025, the Puget Sound region will be home to nearly 9.4 million residents. Why does living here matter and when is living on a giant green sponge a good thing? Why are working farms and forests key to our future?

Read on and discover.

Welcome.

What Sponge?

All the lovely, verdant green spaces we race, trace, tromp, troll, skip, run, hike, bike, climb and reflect on are like a giant sponge, soaking in rain and the stuff that rain carries — the detritus of our lives (oil, pollutants, chemicals and other yucky stuff). Farms and forests, along with parks, wetlands and other jewel toned green spaces act as a buffer and sponge against all that life detritus running down our nearly 10,000 streams and rivers right into Puget Sound.

Our places have lyrical names and embody the storied histories of our lives here: Penrose Point, Mayo Cove, Hope Island, Mutiny Bay, Port Susan, Ebey’s Landing, Chico, Tombolo, Lagoon Point, Birch Bay and all those other places where you dug, stretched your legs, found dinner, explored love and otherwise delighted in life here.

Talking about sponges... we do not mean Sponge Bob Square Pants (although we like his style), but all the alive spaces that drew us here to begin with. Put your photo on this Passport and with each stamp you will take a tool with you that will enrich your lives, protect what you love, ensure you can build, decorate, and eat locally and, with that, become part of a local economy that delivers big.
Stamp 1: Buy, Forage & Eat

Buying Local Food
Puget Sound is ground zero for yummy, diverse farm products. We have over 120 farm gate products in the Sound’s 12 counties. Let’s get cookin!

How To Buy Local Farm Products

Find the Farms:
Puget Sound Fresh: www.pugetsoundfresh.org
This annual guide from Cascade Harvest Coalition is a beautifully produced guide. Use it to buy farm products and to visit farms as well.

Take Out a Go-Go:
www.eatlocalonline.com
(two stores in Seattle and one in Burien)

What’s Ripe Now?
www.seasonalconcopia.com/sc/default.asp

The Top Ten Reasons that Local Food Rocks

Taste: Fresher, better tasting, period... with better nutrition to boot!

Commitment: Local farms tend to have stronger community ties and are better stewards of the land.

Efficiency: Closer food systems mean less energy and pollution.

Builds Rural Economies: Local farms are just that, local! More money in the local economy, stronger commitments.

Connections: Knowing how your food is grown allows you to make better, more transparent decisions.

Values: Family farms are great models for values that count: cooperation and responsibility.

Diversity: Locally grown food protects genetic diversity.

Feasts: Local farms produce an incredible array of foods for your table. Yum!

Taxes: Farms require fewer services than development which keeps government services lower.

Food Security: Local food feeds us locally. Like energy, local food makes us more independent.

(Adapted from 10 Reasons to Buy Your Food From Regional Family Farms, Institute for Rural Innovation & Stewardship and Tilth Producers of Washington.)
How to Help your Neighbors

We produce enough food for everyone to eat. Many families need a bit of help from their neighbors. Here’s how to pitch in:

As a Resident:
Lettuce Link is a great way to share your extra home grown crops, P-Patch crops and community fruit with other families that need help getting nutritious food.

www.solid-ground.org/Programs/Nutrition/Lettuce/Pages/default.aspx
www.seattlefoodcommittee.blogspot.com/p/seattle-food-bank-map.html
www.northwestharvest.org/

Food Life Line runs a number of programs including Grocery Rescue, Produce for the People (King County only) and Kid’s Cafe.

www.foodlifeline.org/how-to-help

If you are in the Food Industry:
www.foodlifeline.org/how-to-help/food-industry

There are state and federal legal protections for food donors:
www.apps.leg.wa.gov/rcw/default.aspx?cite=69.80.031
www.foodlifeline.org/sites/default/files/good-samaritan-laws.pdf

On The Wild Side

Foraging Food
(or searching widely- or wildly- for food and provisions)

We have always foraged but perhaps we have forgotten just how much is out there to discover. Puget Sound’s moisture can be a gift, giving us a vast array of mushrooms, berries, wild greens, seaweed and other edible foods that are beautiful, nutritious and really fun to forage for. This is a great thing to do with families, friends and lovers.

Buying Sustainably Produced Forest Products

There are different systems to manage forests and
in this project, we emphasize wood products that
are Eco labeled by the Forest Stewardship Council™ (FSC®). This type of forest management emphasizes
biodiversity, protects water quality, respects worker
and indigenous rights and the efficient use of all the
forest’s goods (wood, berries, understory plants, and other prod-
ucts called Non-Timber Forest Products or NTFP). It’s the type of
wood specified in LEED® certified green buildings as well.

FSC wood products are identified from start to finish through a
system called Chain of Custody (CoC). It’s like knowing where
your kids are at all times.

From the Northwest Natural Resource Group
www.nnrg.org/wood-products

Buy from your Local Home Store
You can buy FSC products at a wide range of retailers by simply
looking for the label. This includes national retailers like Home
Depot, Target, Walmart, Office Depot, Staples, FedEx Office,
as well as many other local and regional ones.

Try a Different Search Method On-Line
The main advantage in buying from a CoC company is that the
FSC claim can be passed on (i.e. for a LEED® or BuiltGreen
project, or for further resale). As an example, you can search
for FSC Chain of Custody certified companies at info.fsc.org
and do the following:

> Uncheck the Sites/Members box
> Enter “WA” in the State/Province field
> Enter ”United States in the Country field
> You should get 122 or so companies, some
of which do retail

If you are a Builder, Architect or in the Trade
You can use the Product Inquiry form at:
This goes to a wide range of FSC companies and is also B2B focused.
Stamp 2: Craft

Wild Crafting (or what Martha would do?)

Make herbal tinctures, home remedies, crafts, gifts and other forms of creative license that will make your friends green with envy

Policies That Support Working Farms and Forests  
For those of you inclined to become more politically active, here are a few policies that you can help promote through your legislators, agencies and elected officials. Let your elected and public officials know that you care about regional farms and family forests.

Protect Working Forests  
Policies Important to Small Forest Landowners:  
King County Public Benefit Rating System – provides tax benefits for landowners keeping their land as a working forest:  

King County Transfer of Development Rights Program – enables landowners to sell a conservation easement and keep their property as working forest in perpetuity:  

Protect Farms  
Policies Important to Local Agriculture:  
Farm Bill (platforms that support sustainable and organic agriculture, community health, etc.)

Climate Change:  
Continued funding for Climate Friendly Farming:  
www.csanr.wsu.edu/CFF/

Food Safety Modernization Act  
King County Farmland Preservation Program  
www.kingcounty.gov/environment/wlr/sections-programs/rural-regional-services-section/agriculture-program/farmland-preservation-program.aspx

Organizations you can Contribute to:  
American Farmland Trust

Cascade Harvest Coalition:  
Our Team Member runs programs that support sustainable farming:  
Washington Farm Link, Puget Sound Fresh, Farm-to-Table  

Organic Consumers Association  
PCC Farmland Trust  
Seattle Tilth  
Tilth Producers of Washington  
Washington Sustainable Food and Farming Network

> King Conservation District Board
> All Puget Sound area Conservation Districts
> State and Federal Representatives

About Where Cows Meet Clams (Critters + Commerce + Culture)

Recognizing that working farms and small forest lands in east King County were quickly being gobbled up by rapidly expanding housing and other development, a group of four organizations added a bit more to the great ongoing work by King County, Mountains to Sound Greenway Trust and Stewardship Partners by evaluating ways to build success in these working land owners (read: more money, more product market saturation, more support and protect, right-minded regulations), add a tourism twist and widen the camera lens to connect the disconnected:

Forest and Farms + Fish Bearing Streams + Shellfish = Puget Sound Economy and Community
(Critters and commerce and culture alike– in one DNA strand)

Read Some Nice Press Coverage About the Project Here:
www.crosscut.com/2013/02/18/environment/113026/can-farms-save-puget-sound-shellfish/

Washington, the Evergreen State.
Washington, the Farm State.
Washington, the Shellfish State.

We are gifted with an exquisite and particular combination of soil nutrients, mountains and climate, which makes this part of the world one of the most productive places in the United States for farming and forestry.

Where Cows Meet Clams is a project to keep working farms and forests in the Snoqualmie Valley for future generations, including you. The project name implies that how the land in the Valley– as well as other working farms and family forests in the Puget Sound area– is treated affects both the quality of the soil as well as the quality of water in the Sound resulting from polluted runoff from the mountains to the Sound. They are connected, both physically and economically. This means we need to do everything possible to prevent conversion to development, an act of permanence.

Buy Local, be Local, Protect Local.
King County Farming and Forestry and its Context

Washington’s 230 agricultural commodities are second only to California. Our wine industry is the largest in the country after California. Women operate more than 20% of all farms in the state. Agriculture is also the second leading export sector in the State after aircraft and ahead of computers and electronics. (Washington Office of Financial Management (OFM), 2008).

More than two-thirds of King County is forested by 877,000 acres. In 2011, approximately $65.4 million of revenue was earned from timber harvest of timber in King County. If the County develops greater capacity for milling, this revenue source could be increased. Architects and homeowners could walk the forests from which their homes have grown, developing a bond to the ecosystem with which their home is linked (Washington State Department of Revenue Timber Excise Tax reporting). For every million dollars invested in forest health management and forest restoration, 15.5 jobs are supported and $1.9 million in extended revenue is generated.

Snoqualmie Valley is flanked to the west by rapidly growing and attractive suburbs and cities and to the east by green-cloaked forests, home to yummy salmon, rural livelihoods, clean water and air, gifted by our forests and what they do for us. There are 1,790 farms representing 49,285 acres, and 3,293 forest landowners representing 73,397 acres of non-industrial private forest land in King County. This part of the world has one of the last intact rain forests in North America. Sandwiched between the more developed west and the forested east is a north-south swath of incredibly beautiful farms and forests that enrich us as humans.

A Stake in the Ground

As citizens, outdoor recreationists, community activists, natural resource policy experts, home dwellers, tourism professionals, chefs, foodies, parents and lovers of things beautiful, you have a stake in the ground:

- Fall in love in the woods
- Buy local shellfish
- BBQ some local oysters
- Cook something yummy from a local farm
- Engage with a farmer and forester
- Eat local food prepared locally
- Build with local timber products
- Luxuriate over a hearty fall meal with morels
- Grill a wild salmon with your friends at the beach
- Visit heritage sites, tourism attractions, unique restaurants and natural places
- Enjoy a view while hiking, uninterrupted by hundreds of acres of forest clear cuts
- Breathe deeply, drink water deeply. Live your values.

It Takes a Village

Over the course of the project many people have devoted time, energy and smarts to the project including:

Ava Souza, Mark Musick and Deirdre Grace, King Conservation District
Lane Youngblood, Rosy Smits and Sheryl Watts, Camp Korey
Cindy Krepky, Dog Mountain Farm
Cindy Spiry and Heidi Bohan, Snoqualmie Tribe
Judy Neldam, Grange Cafe
Kristi McClelland, Kathy Creahan, Todd Klinka, Alan Painter and Claire Dyckman, King County Department of Natural Resources and Parks
Marco Pinchot, Bill Dewey, Xinh Dwelley and Kate McDermott, Taylor Shellfish Farm
Rachel Allison, Jenn McKeown and Doug Schindler, Mountains to Sound Greenway Trust
Rob Hyman, Interplay Experience Design

Sarah Cassidy and Luke Woodward, Oxbow Farms
David Burger, Alex Ko and Deborah Oaks, Stewardship Partners
Doug Peters, Washington State Department of Commerce
Thank you to our Funders.

This Passport to Living in the Puget Sound Region is brought to you by the Team of; King Conservation District, Cascade Harvest Coalition, Calyx Sustainable Tourism, Northwest Natural Resource Group and the Happy Face of Government, through an Environmental Protection Agency Grant (PC 00J276-2).

Thank you EPA!

This project was supported by Grant No. PC 00J276-2, awarded by The Environmental Protection Agency. Funds are administered by the Washington State Department of Commerce.
