* This data is based on information provided to PSRC from the Washington State Department of Transportation and through FTA's TEAM grants database regarding closed federal grants. Our procedure for compiling this information is to only include those projects for which all federal grants have closed - i.e., if a project has more than one federal grant, if any of those grants have not yet been closed, that project does not appear on this list. In addition, since there may be multiple projects within one FTA grant, there may be more projects completed with FTA funds than appear on this list - in order to maintain a consistent and validated methodology, projects only appear on this list if there has been identification of a closed federal grant.

H-3. PROJECTS DELAYED IN FFY 2008 & 2009

The Regional Council's Project Tracking System collects data on a monthly basis regarding delays to projects with PSRC funds. The most current reports are available on the PSRC website (<http://www.psrc.org/projects/tip/tracking/index.htm>). In addition, the 2005 Action Strategy provides a status report on the projects contained in the first 10 years of the long-range transportation plan, Destination 2030 (<http://www.psrc.org/projects/mtp/d2030impl.htm>).
