Accessibility Updates: WCAG

Web Content Accessibility Guidelines:

The federal law requiring WCAG compliance for state and local government websites and mobile applications mandates that public entities with a total population of 50,000 or more must ensure their web content and mobile apps comply with Level A and Level AA success criteria and conformance requirements specified in WCAG 2.1. Smaller entities and special district governments have until **April 26, 2027**, to comply. The rule is a legally binding requirement under the ADA, and non-compliance may result in legal consequences.
