Summary of Project Information

Summary of Project Information

Identify whether the project in this application is sustaining, new, or expansion.

Need for Service:

Continuing service (new to this grant program)

Expansion can't be combined with sustaining existing service in the same application for the first biennium.

Capital equipment for a mobility management project includes items that have a useful life of more than one year, exceed your organization's capital cost threshold or \$10,000, and are subject to depreciation and inventory tracking.

Examples for mobility management include information kiosks and technology.

Does your mobility management project include the purchase of capital equipment?* No

Checking "Yes" for federal funds means that your organization is willing and able to comply with the associated federal requirements, such as federal drug and alcohol testing procedures, Title VI activities, and federal small business enterprise (FSBE) requirements. For examples of federal requirements from last biennium, refer to the Public Transportation Grant Guidebook.

Willing to Accept FTA funds for the biennium?* Yes

If project is a purchase-of-service type, the eligible funding source and match rate may be affected.

Is this a purchase-of-service project?* Yes

If your organization has proof of 501(c) nonprofit status, the project may be eligible for state paratransit special needs competitive funds.

Does your organization have 501(c) nonprofit status?* No

Choose the congressional district(s), legislative district(s), and county(ies) this project will serve (include the entire project area)

Scope of Work

Scope of Work

Select the Regional Transportation Planning Organization (RTPO) / Metropolitan Planning Organization (MPO) that will be ranking this project from the drop-down menu.

RTPO/MPO* Puget Sound Regional Council

Project Summary (Scope)

Provide a brief, high-level description of what your project proposes to do (address what the project is, whom it serves, and where the service occurs).

This summary will be used in your grant agreement and may also be used to describe your project to the Legislature.

Proposed summary/scope of work*:

Fund continuation of the TDM and ridesharing platform RideshareOnline.com (RSO) for regional stakeholders in PSRC's jurisdiction after the current WSDOT contract expires 3/2027. RSO currently serves counties, transit agencies, cities, TMAs, employers, schools and commuters/travelers statewide with a concentration of users in the Puget Sound region.

Project Description

Provide a detailed description of the tasks, activities, and deliverables your project will complete. Your narrative should reflect the full life of the project and demonstrate how the proposed activities align with the grant program's goals.

Description of project*:

This project requests funding to continue RSO after WSDOT's current statewide contract expires in March 2027. RSO is a multimodal ridematching and TDM platform used across PSRC's four-county region to support carpools, vanpools, and other non-drive-alone travel options including for rural residents who rely on shared-ride solutions.

Project activities include sustaining core RSO modules:

Ridematching - connects individuals forming carpools, vanpools, bike/walk groups, and one-time trip matches. RSO has supported more than 250,000 ridematch searches since 2020.

Trip Calendaring - enables employers, TMAs, transit agencies, and incentive programs (e.g., WSRO Switch Your Trips, Choose Your Way Bellevue) to track and reward non-drive-alone trips and manage commuter benefits.

Outreach Tools - supports user engagement, incentives, and major transportation initiatives such as I-405 tolling, the West Seattle Bridge closure, and Switch Your Trips campaigns.

Vanpool Support- allows transit agencies (King County Metro, Community Transit, Kitsap Transit) to advertise seat availability, match riders, and manage key administrative functions.

Together, these tasks sustain a critical regional mobility management tool that reduces drive-alone trips, strengthens coordination, and enhances multimodal access across the Puget Sound region.

Project Need

Why is this project needed, and how does this proposal address the need? How would the community be affected if the grant is not awarded?

Include a description of the transportation problem that aligns with the need identified in the Coordinated Public Transit-Human Services Transportation Plan (CPT-HSTP). Explain how the problem was identified and describe how the proposed project will address it.

Need*:

RideshareOnline.com (RSO) is used by King County Metro, Community Transit, Kitsap Transit, TMAs, Seattle, Bellevue, Redmond, major employers, schools, and thousands of travelers. More than 7,000 users rely on RSO, including 6,000 new registrants in 2025, showing continued demand for easy, affordable trip-planning tools.

This project addresses Need #5 in the Coordinated Mobility Plan, which calls for expanding awareness and use of non-drive-alone modes through coordinated information resources. RSO supports this need by offering a single platform for carpool, vanpool, and multimodal matching across county lines. With rising fuel costs, long commutes, and limited rural transportation options, RSO is especially important for low-income travelers, disabled individuals, non-drivers, shift workers, and those making cross-county trips.

The transportation problem was identified through PSRC planning, regional TDM coalitions, employer coordinators, and feedback showing strong reliance on shared-ride options. Without continuation funding, jurisdictions, TMAs, agencies, and employers would lose access to a unified ridematching and trip-tracking platform. Individual agencies would be forced to purchase separate systems, increasing costs and reducing coordination. Vanpool programs-among the largest in the nation-would lose essential rider-matching and administrative tools, likely reducing ridership and weakening regional trip-reduction goals.

Area Served

Is this project primarily serving a rural area?*

No

Any service that supports public transportation in rural areas with populations less than 50,000.

Is this project primarily serving the Seattle, Tacoma, Everett urbanized area?: Yes

Special Needs Transportation

To be eligible for special needs transportation funding, applicants must address how their project advances the efficiency in, accessibility to, or coordination of transportation services provided to persons with special transportation needs, as defined in RCW 81.66.010(3).

Does this project advance efficiencies in, accessibility to, or coordination of special needs transportation?* Yes

Describe how your project advances these areas, and the approach you are using to achieve these improvements. Additionally, identify the special needs population(s) to be served by this project.

Special Needs Transportation:

RSO serves special needs and priority populations, including low-income and rural populations, disabled individuals, non-drivers, older adults, shift workers, people with limited English proficiency, and individuals with long trips that cross county boundaries.

RSO facilitates access to public transit and also complements public transit. Users can find a vanpool (public transit) or a vanshare (a first mile-last mile option that connects to fixed-route transit). Users can also find a carpool partner, which is complementary to all other modes of transportation.

On average, 8% of active RSO users in the 4-county region live outside of an Urban Growth Area (however, it is as high as 21% in Pierce County and 38% in Kitsap County).

In King County, 30% of vanpools in RSO are coming from an Equity Priority Area (EPA) as defined by the county, and 91% of vanpools are travelling to a workplace in a Job Equity Priority Area (JEPA) (see attached maps).

When someone searches for a ridematch in RSO, they can indicate whether they are providing or requesting accessibility accommodations, including space for an attendant or service animal, a step stool, room for a walker or wheelchair, or other need. In 2025, over 200 searches included an offer of accessibility accommodations. Vanpools listed in RSO can accommodate disabled riders.

RSO also has a very low barrier to entry; anyone with basic computer access can search for carpools or vanpools and customize schedules, making it mobility-friendly for shift workers and riders with unique travel needs.

RSO is offered in both English and Spanish, with other languages supported by browser plugins. If approved for grant funding, we plan to explore the addition of additional languages common in our region.

Marketing will include targeted efforts to increase awareness and engagement with special needs/priority population.

Project Staff

Provide the names of the key staff who will be working on this project, along with their years of experience and relevant qualifications. Include their experience managing similar projects, with specific attention to responsibilities for grant financial management, budget oversight, documentation, and compliance.

Project Staff*:

As an organization, Metro has extensive experience with RSO. Metro has worked closely with the WSDOT Public Transportation Division (PTD) for over 16 years as the lead administrator for RSO statewide. Metro has worked with administrators from agencies, jurisdictions, TMAs and employers to educate them on how to best utilize the platform to achieve results for their constituents.

Metro has developed training materials and resources and hosts monthly office hours for users of RSO. Metro acts as the liaison with Interact Soft Inc., meeting with them weekly to identify platform issues, fix software bugs, analyze data and performance, and develop new features and modules. Metro is the main point of contact for all administrators statewide to help address questions and issues with the platform's functionality.

Key staff who will continue to manage RSO include:

Jason Halvorsen - Mobility Services Supervisor. 12 years managing the RSO platform. 24 years of experience in TDM, technology systems, grants & finance, outreach & education.

Charles Bowers - Sr. Transportation Planner. 2 years managing the RSO platform. 12 years of experience in TDM, employer transportation programs, outreach & education, project & program management.

Additional staff throughout Metro's Mobility Division will be supporting this project as needed, including experienced individuals from the TDM team, Contracted Services (1 FTE equivalent), Grants Administration and Finance.

Relationship to Other Projects

Relationship to Other Projects

Is this project dependent on any other projects submitted by your organization?*

No

Did you, or will you, apply for this project in another grant program this biennium?*

No

Have you applied for the same project in a prior biennium and did not receive funding?*

No

Are you applying for other projects within this funding opportunity?*

Yes

List all project applications for this funding opportunity, including this project, in order of priority*:

1. Sustain Hyde Shuttle Service
2. Sustain RideshareOnline.com as a TDM and Ridesharing Platform

Planning and Coordination

Coordinated Public Transit - Human Services Transportation Plan

Coordinated Public

Transit - Human

Transportation Plan

Page

number(s)

or TBD

How is the need in the CPT-HSTP met by this project?

Puget Sound Regional Council	56-57, 59, 68	RSO directly fulfills CMP Need #5 (Rider education and awareness). It's interface, trip calendars, and ridematching tools help riders learn how to use shared-ride modes and navigate multimodal options - rider-education tools CMP calls for. RSO's structured, step-by-step trip-planning and easy interface supports riders with limited English proficiency by simplifying navigation. RSO also provides easy-to-use digital trip-planning tools, exactly this type of mobility-friendly, low-barrier platform.
Puget Sound Regional Council	67	High Priority Strategy #4 (Context-appropriate transportation options for rural/low-transit areas) RSO directly supports residents in areas without fixed-route service. Rural residents reported having "little to no transit options" and emphasized the need for context-appropriate transportation like shared rides and flexible mobility solutions. RSO offers an accessible way for rural travelers to identify shared-ride opportunities when bus or ADA paratransit service is unavailable or limited.
Puget Sound Regional Council	61	The CMP states the urgent need for sustainable funding for mobility programs and coordination tools. RSO continuation directly fulfills this need by maintaining a core regional mobility management and TDM asset that would otherwise lapse after March 2027.
Puget Sound Regional Council	35, 51, 104- 106	These pages explain the importance of information systems, referrals, trip planning aids, and cross-county coordination. This project sustains a critical statewide platform that is heavily used within PSRC's jurisdiction. RSO aligns directly with mobility management objectives, supporting trip planning, mode awareness, access to employer commuter programs, and reducing barriers for priority populations.

Cross-region Project

Does this project have a service area that crosses RTP/MPO planning boundaries?* No

Project Coordination

Describe coordination efforts. Include details such as:

- How is the project reflected in regional plans?
- Which prioritized strategies are being addressed?
- Who was involved in defining the transportation problem?
- Other alternatives considered for addressing the problem.
- Demonstrations of local/regional coordination in implementing the proposed project.

Coordination Efforts*:

RSO has supported coordinated travel options since 2001, bringing vanpool programs and multimodal trip-planning tools from multiple agencies together under one platform. This shared system reduces duplication, supports regional consistency, and offers travelers more non-drive-alone options.

Under a new Metro-managed contract, RSO would continue serving as a regional ridematching and TDM tool, with vanpool, incentives, and engagement modules available to agencies, jurisdictions, TMAs, employers, and networks across the PSRC four-county region. Kitsap Transit and Community Transit have expressed interest through letters of support, demonstrating regional coordination.

The project aligns with several regional plans. It supports WSDOT's vision for a safe, sustainable, integrated multimodal system and the 2025-29 CTR Plan goal of increasing high-efficiency commute options. It advances goals in the Regional Transportation Plan to preserve the system and strengthen multimodal access. The Coordinated Mobility Plan identifies the need for clearer rider information and trip-planning resources (Need #5), which RSO directly provides. The Regional CTR Plan lists RSO as a key platform for marketing, education, and CTR service delivery.

The transportation problem was defined through coordination with transit agencies, PSRC mobility coalitions, TMAs, jurisdictions, and employer transportation coordinators, who consistently report fragmented information, limited awareness of non-drive-alone options, and the need for a unified trip-planning tool. Alternatives considered included agency-specific ridematching tools or individual vendor procurements, but these would increase costs, fragment the user experience, and reduce coordination between agencies. RSO provides a cost-effective, shared regional solution.

Ongoing coordination with transit agencies, TMAs, jurisdictions, and employer networks demonstrates strong regional commitment to sustain and improve this successful platform.

By selecting yes, you acknowledge that you coordinated or will coordinate this project with the planning organization(s) within the region(s) this project serves*:

Yes

How does your project connect to, coordinate with, leverage, or enhance other modes of transportation in your service area (e.g., aviation, intercity bus or rail, park-and-rides, bicycle/pedestrian)?

In your response, include how the multimodal partnerships for this project will improve or enhance access to social services.

What efficiencies will be gained within the service area as a result of this project?

Multimodal Partnerships*:

RSO helps meet Need #5 as outlined in PSRC's Coordinated Mobility Plan by connecting people to transportation options. RideshareOnline.com (RSO) enhances multimodal connectivity across PSRC's region by linking users to vanpools, vanshares, carpools, biking and walking groups, and first/last-mile connections to fixed-route transit. Vanshares created through RSO provide direct links to rail stations, ferry terminals, and park-and-rides, while carpools arranged through the platform often serve as feeder trips to transit hubs. RSO supports bicycle and pedestrian modes by enabling group-matching and trip-tracking for active transportation.

RSO strengthens community mobility networks by facilitating peer-to-peer shared rides, including accessible ride offers that help neighbors reach medical appointments, grocery stores, social services, senior centers, and other essential destinations. Riders can specify accessibility needs, trip purpose, and whether they require one-way or round-trip travel, improving usability for priority populations.

Regional campaigns and incentives hosted on RSO promote non-drive-alone travel-reducing congestion, lowering

emissions, and improving multimodal system efficiency. By maintaining a unified platform used by transit agencies, employers, cities, TMAs, and schools, RSO improves coordination across transportation modes and expands access to social-service destinations for those who rely on shared, flexible, multimodal options.

Budget

Duration of Project

Duration of Project*: Four Years

Expenses

Expenses	If Other, List the Expense	** July 1, 2025 - June 30, 2027 (Current Estimate)	July 1, 2027 - June 30, 2029 (Projected)	Variance Between Biennia	** July 1, 2029 - June 30, 2031 (Projected)	Variance Between Biennia
Contracted Services - Other		\$524,981.00	\$652,392.00	24.27%	\$692,123.00	6.09%
Labor & Benefits		\$248,449.00	\$262,488.00	5.65%	\$278,474.00	6.09%
		\$773,430.00	\$914,880.00		\$970,597.00	

Sources of Revenue/Match

Revenue/Match Source	If Other, List the Source	** July 1, 2025 - June 30, 2027 (Current Estimate)	July 1, 2027 - June 30, 2029 (Projected)	** July 1, 2029 - June 30, 2031 (Projected)
Local: Transit Sales Tax		\$154,686.00	\$182,976.00	\$194,119.00

Fares and Donations

Row	July 1, 2025 - June 30, 2027 (Current Estimate)	July 1, 2027 - June 30, 2029 (Projected)	July 1, 2029 - June 30, 2031 (Projected)
Fares and rides donations	\$0.00	\$0.00	\$0.00

Variances

Variance between 2025-2027 and 2027-2029: 18.29%

Variance between 2027-2029 and 2029-2031: 6.09%

Variances:

Variances reflect a 3% annual inflation rate. The variance in Contracted Services - Other reflects the fact that in the current 2025-2027 biennia, we do not have a marketing budget for RSO. The marketing budget included in this line item for the 27-29 and 29-31 biennia is \$50,000 annually per Metro's estimate.

Other Sources and In-Kind Match

Other Sources*:

N/A

Are you using in-kind match?*: Yes

You must provide an in-kind valuation plan in the Attachments section.

Describe the in-kind match:

N/A

Other Support**Other Support:**

King County Metro has committed secured match in the amount of \$377,095 to support project completion. These funds are secured through dedicated local sales tax and farebox revenues. See attached match letter of support.

Metro is also in conversations with Kitsap Transit and Community Transit to discuss a possible cost-share agreement (see attached letters of support). Note that Pierce Transit currently does not use RSO, but Metro envisions that all agencies, including Pierce Transit, within PSRC's 4-county area will be eligible to participate in a cost-share agreement if they so wish.

Budget Development Methodology**Budget development methodology*:**

We used the actual existing invoices from Interact Soft Inc. for the RSO platform cost through March 2027, and we assumed a 3% inflation rate for every subsequent contract year.

For Metro's labor cost, we assumed that the management of the RSO platform would require .37 FTE of a Transportation Planner III. This is a reasonable assumption given the workload required to administer the program, including vendor oversight, platform development, education and outreach. The labor cost also assumes a 3% inflation rate.

We have included a \$50,000 annual marketing cost to increase awareness and engagement in general, and in particular with special needs/priority populations. This high-level cost estimate was provided by Metro's Marketing department and is reasonable given the regional scope of our marketing efforts, which could include things billboards, bus signs, social media campaigns, and other forms of mass marketing.

Summary

July 1, 2027 - June 30, 2029

Total Expenses: \$914,880.00

Match Total: \$182,976.00

Requested Amount:

\$731,904.00

This is the amount of grant funds your organization is requesting from July 1, 2027 - June 30, 2029

Percentage of Match: 20.00%

July 1, 2029 - June 30, 2031

Total Expenses: \$970,597.00

Match Total: \$194,119.00

Requested Amount:

\$776,478.00

This is the amount of grant funds your organization is requesting from July 1, 2029 - June 30, 2031

Percentage of Match: 20.00%

Indirect Costs

Indirect Costs

Are you charging indirect costs to this grant/project?* Yes

Select the method your organization uses to apply indirect costs to this project.

Method*: Negotiated indirect cost rate

If you selected a negotiated indirect cost rate, what is your current rate and expiration date?

Rate: 81 %

Expiration Date: 12/31/2026

If the rate will expire before the grant agreement begins, what rate will you apply until a new rate is approved?

Rate: 81 %

Measurable Outcomes

Measurable Outcomes

For mobility management, summarize the intended outputs of this project in both quantitative (statistical) and qualitative (narrative) formats.

There may be some projects where traditional performance measures (e.g., revenue vehicle hours/miles, passenger trips) do not apply.

In those cases, quantitative objectives can be used instead by submitting the following information: the number of trainings conducted, outreach events completed, passengers served, or other measurable outcomes generated by this project.

Identify the data sources and monitoring processes you will use to track these outcomes.

Be sure to include a quantitative output, as this will serve as the baseline measurement for your next biennium application. Qualitative measures are optional.

Intended Outputs*:

The purpose of this mobility management project is to increase use of RideshareOnline.com (RSO) for multimodal trip-planning, shared-ride formation, and non-drive-alone travel. Success will be measured through growth in platform use, increased formation of shared-ride options, and expanded engagement from residents, employers, schools, and TMAs across the PSRC region. These outcomes directly support statewide mobility management goals and reduce drive-alone trips.

Quantitative Outputs (Annual Goals):

Active Users:

- Active users within Urban Growth Areas (UGAs). Baseline: 5,177 (92%). Goal: +5% per year.
- Active users outside UGAs. Baseline: 474 (8%). Goal: +5% per year.

Rideshare Formation:

- Ridematch searches performed. Baseline: 4,728 (2025). Goal: +5% per year.
- Ridematch trips created offering accessibility accommodations. Baseline: 232 (2025). Goal: +10% per year.
- King County vanpools originating in Equity Priority Areas (EPA). Baseline: 270. Goal: +5% per year.
- King County vanpools traveling to worksites in Job Equity Priority Areas (JEPA). Baseline: 822. Goal: +5% per year.

Trip Calendaring & Mode Shift:

- Non-drive-alone trips logged. Baseline: 327,502 (2025). Goal: +5% per year.
- Fuel/emissions reduction measured using RSO's mode-shift calculators; annual reduction targets set each year using prior-year baseline.

Outreach & Education:

- Incentive campaigns hosted on RSO. Baseline: 19 (2025). Goal: +25% per year.
- Outreach engagements (employers, TMAs, schools, jurisdictions). Baseline: 40 events (2025). Goal: +10% per year.

Qualitative Outcomes (Optional per NOFO):

- Increased awareness of multimodal options among priority/special-needs populations.
- Improved access to carpools, vanpools, and other shared modes for users with accessibility needs.
- Strengthened partnerships with employers, transit agencies, TMAs, and local governments.

Data Sources & Monitoring Processes:

- RSO's integrated analytics dashboard will provide monthly data on user activity, ridematch searches, trip-calendaring totals, incentive participation, and accessibility-related trip features.
- Outreach metrics will be tracked through event logs, partner submissions, participant counts, and digital engagement analytics.
- Annual summaries will be compiled for WSDOT reporting and will serve as baseline comparisons for the next biennium.

How will your organization measure whether the project is successful?

Describe the steps you will take to improve performance if your project does not meet the identified performance targets.

Project Success Measurement*:

Project success will be measured by evaluating progress toward the annual performance targets identified in the Intended Outputs section of the application. RideshareOnline.com (RSO) provides comprehensive reporting through its administrative analytics dashboard, including user activity, ridematch searches, shared-ride formation,

trip-calendaring totals, outreach participation, and accessibility-related trip features.

These quantitative indicators will be monitored monthly and summarized in semi-annual performance reviews to assess whether the project is on track to meet annual goals over the two-year biennium.

If performance does not meet the identified targets, our organization will implement a structured performance-improvement process. First, we will conduct diagnostic analysis using RSO's backend reporting tools to identify gaps-for example, geographic areas with low adoption, partner networks with reduced participation, or underperforming incentive campaigns. We will work with regional partners-including transit agencies, CTR administrators, TMAs, employers, and schools-to strengthen engagement and identify localized barriers affecting participation.

Corrective actions may include:

- Adjusting marketing and outreach strategies toward underrepresented user groups, EPA/JEPA communities, or priority populations.
- Increasing the frequency or value of incentive campaigns using RSO, supported by King County Metro's inventory of gift cards.
- Enhancing ridematch promotions for carpools, vanpools, vanshares, bike buses, and walking groups.
- Providing additional technical assistance or training to partner organizations to improve understanding and use of RSO tools.
- Refining messaging and campaign targeting using digital analytics and partner feedback.

Performance will be re-evaluated quarterly to determine the effectiveness of corrective actions, and strategies will be adjusted as needed to achieve measurable improvements. This adaptive management approach ensures continuous progress toward annual targets throughout the biennium.

Milestones

Readiness to Proceed

Will your project be ready to proceed at the start of the biennium?*: Yes

Milestones

Activities	Date (mm/yy)
Project Start	07/27
Project Complete	06/29

Supplemental Information

Supplemental Information

Supplemental Information:

To support the response discussing King County Defined Equity Priority Areas (EPA) in the Special Needs Populations, Measurable Outcomes and Vulnerable Population in Overburdened Communities sections Please see King County Vanpool Group Origins and Equity Priority Areas (EPA) Map attached to the Attachments - Supplemental Information section.

Vulnerable Populations in Overburdened Communities & Tribes

Vulnerable Populations in Overburdened Communities

Identify the type of direct and meaningful benefits your project provides to vulnerable populations using the descriptions above, if applicable. Explain how your project delivers these benefits and the impact it will have on the populations served.

Vulnerable Populations in Overburdened Communities*:

RSO provides economic and environmental benefits to vulnerable populations in overburdened communities. The attached map shows how vanpools listed in RSO originate and terminate within King County Equity Priority Areas (EPAs) and Job Equity Priority Areas (JEPAs). These vanpools are publicly listed on RSO, which is the primary tool connecting riders to these groups. Currently, 30% of King County vanpools begin in EPAs and 91% travel to workplaces in JEPAs, demonstrating that RSO supports commuters in communities disproportionately affected by environmental burdens and socioeconomic inequities.

By connecting residents to carpools, vanpools, and vanshares, RSO provides cost-effective, reliable transportation for workers in overburdened communities. Shared-ride options expand access to employment, lower transportation costs, and serve residents with limited access to vehicles or fixed-route transit. These benefits are critical in EPAs and JEPAs, where many residents are low-income, people of color, immigrants, limited-English-proficient, or disabled.

RSO also delivers measurable environmental benefits. Since 2010, it has recorded 26 million non-SOV trips, reducing an estimated 17 million gallons of fuel and 324 million pounds of CO₂. These avoided emissions help reduce fossil-fuel pollution in communities already facing cumulative environmental impacts.

RSO has also supported vulnerable communities through targeted outreach, including promotion of King County Metro's reduced-fare vanpool pilot, which offered a \$49/month fare for commuters living or working in Kent—an area with significant EPA and JEPA overlap and high exposure to environmental and economic risk.

By expanding affordable shared-ride options, improving access to essential jobs, and reducing emissions in highly impacted areas, RSO delivers direct, meaningful benefits aligned with definitions of vulnerable populations and overburdened communities under RCW 70A.65 and RCW 70A.02.

If these populations were engaged by you or your representatives in developing or maintaining the project, describe the outreach efforts and results. Include details such as methods used to engage the community, feedback received, and how the input influenced the project's design or implementation.

Inclusive outreach in planning:

For the reduced fare vanpool pilot, King County Metro conducted extensive outreach in Kent, an EPA/JEPA community that includes both urban and rural areas using employer visits, postcard mailings, social media, billboards, gas station displays, and engagement at community events such as the Kent Summer Concert Series and Chamber of Commerce meetings. While the pilot resulted in only one new vanpool, outreach feedback was valuable.

One key takeaway is that employees, especially those at small or rural employers, reported limited awareness of

vanpooling, carpooling, and other non fixed route options. This insight directly shaped our approach: increasing promotion of RSO within EPAs, rural communities, and small employers to ensure vulnerable populations can more easily discover and access shared ride options. These lessons continue to inform ongoing outreach and platform improvements.

Tribal Support

Is this project directly operated by a tribe?* No

Is your project serving and is it supported by a tribal nation in Washington?: No

Environmental Justice

Environmental Justice Assessment (EJA)

You must conduct an Environmental Justice Assessment (EJA) if you apply for \$15 million or more in grant funds.

Are you requesting \$15 million or more in WSDOT funds for your proposed project?* No

Certificate of Indirect Costs

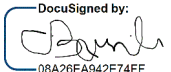

This is to certify that I have reviewed the indirect cost rate proposal submitted herewith and to the best of my knowledge and belief:

(1) All costs included in this Indirect Cost Rate Proposal dated June 07, 2024 to establish billing or final indirect costs rates for FY 2021 are allowable in accordance with the requirements of the Federal award(s) to which they apply and 2 CFR 200. Unallowable costs have been adjusted for in allocating costs as indicated in the Indirect Cost Rate Proposal.

(2) All costs included in this Indirect Cost Rate Proposal are properly allocable to Federal awards on the basis of a beneficial or causal relationship between the expenses incurred and the agreements to which they are allocated in accordance with applicable requirements. Further, the same costs that have been treated as indirect costs have not been claimed as direct costs.

I declare that the foregoing is true and correct.

Metro Transit Division
FY 2021 Burdening Rate Calculation**

Cost Allocation Narrative

King County Metro Transit Department (Metro Transit) is the Puget Sound region's largest public transportation agency. Metro Transit provides bus, paratransit, vanpool, and water taxi services, and operates Seattle Streetcar, Sound Transit Link light rail, and Sound Transit Express bus service. It is a department within the Metropolitan King County government and is funded in large part through the Public Transportation Enterprise Fund, a major enterprise fund as reported in the County's Annual Comprehensive Financial Report (ACFR). The ACFR accounts for the operations, maintenance, capital improvements, expansion of public transportation facilities in King County under Metro Transit, and expansion of the County's Water Taxi service between downtown Seattle, Vashon Island and West Seattle under the Marine Division. Primary revenue sources include sales tax and passenger service fees. Construction and fleet replacement are funded through sales taxes, bonds and federal grants.

The burden (fringe benefit) rates for FY 2021 are based on the total expenses incurred in FY 2021 and reconcile to Oracle EBS, which is King County's system of record for all financial transactions and is the official financial accounting record of the County. The expenses used in the calculation are from the project module within Oracle supporting incurred costs allocated and billed under Federally funded awards. Metro Transit has prepared the burden rates subject to the requirements specified under 2 CFR 200, Appendix VII.F.1.

Type of Rate

The burden rates are prepared annually based on incurred costs for each cost accounting period. Burdening rates are calculated for all organizational cost centers comprising the Capital and Operating Divisions within Metro Transit. Fringe benefit costs were originally billed using provisional rates established in accordance with the Burdening Guidelines prepared by the King County Finance and Business Operations Division (FBOD). This proposal is used to establish final rates that are not subject to adjustment.

Fringe Benefit Cost Pools and Allocation Bases

The fringe benefit allocations are established under the methodology provided in the Burdening Guidelines and include allowable and allocable expenses accumulated within homogeneous cost pools applicable to various types of labor. Allocation bases are segregated by labor type (e.g., Regular Pay, Overtime Pay, Short-term Temporary Pay, etc.).

**King County
State of Washington
Metro Transit Division
FY 2021 Burdening Rate Calculation**

Cost Allocation Narrative

The following table summarizes the burden rates and the general ledger (GL) accounts used to allocate costs to benefitting projects. Please note, Expenditure Type (GL accounts) used to allocate indirect costs, inclusive of Indirect Costs (82300) and KC Differential (82600) are not applicable as indirect cost rates are not applicable to the FY 2021 proposal.

Burden Cost Codes	Description	Expenditure Type (Burdening GL Accounts) for Sponsored Awards)	Burden Cost Base (GL Accounts)		
			Regular Pay (51110)	Short-term Temp Pay (51120)	Overtime Pay (51130)
Fringe Benefits	Employer Paid Benefits for FTE and TLT	82100 EMPLOYER PAID BENEFITS	X		
Extra Help Benefits	Employer Paid Benefits for short term temp	82400 EXTRA HELP INDUST INS OH		X	
Overtime Benefits	Employer Paid Benefits for over time	82500 OVERTIME BENEFITS			X
Paid Time Off	Paid Time Off (Sick, Vacation, Others)	82200 PAID TIME OFF	X		
Indirect Costs (N/A)	Indirect Administrative costs such as county and departmental overhead; excluding any unallowable costs, tied to federally approved Indirect Cost Rate Plan.	82300 INDIRECT COSTS	X	X	X
KC Differential (N/A)	Indirect administrative costs that are unallowable.	82600 KC DIFFERENTIAL	X	X	X
Industrial Insurance	Industrial insurance (if not included in Employee paid benefits)	82700 INDUSTRIAL INSURANCE	X	X	X

FY 2021 Burdening Rate Calculation**

Cost Allocation Narrative

Burdening Rate Calculation Methodology

The burden rates calculated for each Expense Organization (cost center) are included on the Summary schedule (Schedule A). Rates are calculated individually on supporting schedules for each burden rate (see Schedules A.1 through A.5). The rates are based on transactional data from EBS summarized at the cost center and GL account level for all applicable pool and allocation base GL accounts within a cost center. Each column includes a letter code used to define the formulas used to calculate the burden rates and to facilitate an understanding of the methodology supporting each underlying calculation of the components of the burden rate.

It is important to note the differentiation between the types of organizations (cost centers) and their respective treatment within the calculation and GL.

Task Owning Organization – This is the cost center that “receives” charges to various projects. This is where any expense will be ultimately recorded and presented in all financial reports. The default financial hierarchy is based on this lowest level (cost center-> group -> section -> division -> department).

Expenditure Organization – This is the cost center that “initiates” the charge. For example, if an employee’s “home cost center” is “123456”, then all her labor costs will be accumulated in this cost center by default, unless she chooses to charge her time to a different project code. Therefore, for all full-time employees that do not split their time between different projects, the use of Task Owning Organization or Expenditure Organization will provide identical data when analyzing labor costs. Since the Expenditure organization includes the homogeneous cost pools and bases required to calculate burden (fringe) rates, this is the data that is used. Once the rates are established, a project that utilizes burdening (e.g., grant or contract) will receive the appropriate burdening when salary cost are recorded to the project. The Task Organization may be tied to projects that receive charges from multiple Expenditure Organizations.

One of the main goals of developing and approving the indirect cost rate plan is to make sure that full personnel costs are correctly reflected in Metro Transit’s capital projects, most of which are executed in the Capital Division. Capital Division personnel routinely charge their time to individual capital projects (for example, in 2021 \$12.3M of direct labor was charged to individual projects by the division’s staff). All of Metro Transit’s capital projects are supported by two different cost centers that underline our two capital funds

**King County
State of Washington
Metro Transit Division
FY 2021 Burdening Rate Calculation**

Cost Allocation Narrative

(Infrastructure and Fleet). Therefore, all direct labor charged by Metro Transit staff to individual infrastructure projects will be recorded in one cost center (Task Owning Organization) and a labor cost report for the Capital Division using Task Owning Organization would omit the direct labor charged to capital projects. Therefore, for purposes of this analysis and in accordance with burdening rate guidance, Expenditure Organization was appropriately utilized as the basis for calculating the rates.

The following fringe benefit rates are developed and applied to direct labor that is charged to sponsored projects:

Paid Time Off (PTO), Account #82200

- This rate is based on actual paid vacation time, sick leave, and holidays.

Employer Paid (Fringe) Benefits, Account #82100

- This rate is based on Medical/Dental, Retirement Contribution, additional paid benefits and FICA Tax.

Overtime, Account #82500

- This rate is based on the FICA Tax rate and Retirement Contribution applied to paid overtime.

Extra Help, Account #82400

- This rate is based on the FICA Tax rate applied to short-term Temporary employee wages. There are no other fringe benefits associated with this type of labor, so only the FICA rate is applied.

Industrial Insurance, Account #87000

- This rate is based on the actual industrial insurance paid.

Cost Pool Apportionment

Since several rates include some of the same benefit costs, in order to avoid overallocation of costs and overstated burden rates, it is necessary to apportion shared pool components. This is done at the cost center level using the relative percentage of the applicable labor allocation base to total labor. The apportionment schedules are included at Schedules B.1 and B.2. In addition, the proportion of PTO labor and Regular labor are used to allocate benefits pools between the PTO rate and Fringe Benefits rates.

State of Washington
Metro Transit Division
FY 2021 Burdening Rate Calculation**

Cost Allocation Narrative

Reconciliation

Schedule C provides a reconciliation of each burden pool and base GL account to the source EBS data and documents that (1) there is no overallocation of costs, and (2) all costs are allocated and there are no residual amounts.

Schedules C.1 and C.2 include the Oracle EBS personnel related costs by Expense Organization and Task Organization for each fund. The primary capital and operating funds comprising Metro Transit include funds within the Public Transportation Enterprise Fund (PTEF):

PTEF Funds:

3641: PUBLIC TRANS CONST
3642: PUBLIC TRANS REVENUE FLEET
4641: PUBLIC TRANSPORTATION OPERATING

There is an immaterial contribution to the Metro Transit personnel expenses for cost centers in non-Metro Transit funds. In total, these comprise less than .01% of the total expenses.

Schedule C.3 provides a reconciliation, by GL expense account between the EBS project data and the GL as reported in the GL010 report for the PTEF Funds. The first section includes the GL accounts which support the bases and pools for each burden rate calculation. Minor differences were identified resulting from adjusting entries. These are not considered material to the rates. The second section includes GAAP and benefit adjustments recorded in the GL which are not part of the burden rate calculations. The third section includes burdening amounts in the GL that are also not part of the rate calculations. Rather, these are the applied rates for projects that include burdening. As indicated, the total GL personnel expenses agrees to the King County Public Transportation Enterprise Fund Financial Statements (see Page 13, Personnel Expenses).

Fringe Benefit Rates combined and proposed for all Expense Organization (cost centers) for FY 2021 are:

September 8, 2026

To whom it may concern:

King County Metro Transit fully supports its WSDOT Consolidated Grant Application to sustain RideshareOnline.com (RSO) as a regional Transportation Demand Management and ridesharing platform. RSO provides essential mobility support for thousands of people across the four County Puget Sound region, including those with special transportation needs and people in rural areas with limited transit options, by improving access to shared-ride options and helping reduce barriers to employment, healthcare, and essential services.

This project is an important component of King County Metro's commitment to expanding safe, reliable, accessible, and sustainable transportation options beyond fixed-route service. RSO strengthens multimodal connections, supports employer and community trip-reduction programs, and advances regional goals for regional mobility and climate action.

King County Metro commits to providing \$377,095 in total revenue as local match during the four-year grant period (July 1, 2027 – June 30, 2031). This matching contribution is contingent upon appropriation in King County's 2028–2029 biennium budget, expected to be adopted in November 2027.

If you have any questions, please contact Eric Irelan, Grants Administrator, at 206-477-3862.

Sincerely,

RE: King County Metro Mobility Management in King County Consolidated Grant

Dear Christine O'Claire:

Community Transit is pleased to support King County Metro's "Mobility Management in King County" grant application in this year's WSDOT Consolidated Grant application cycle.

King County Metro has a strong history of implementing and sustaining programs and services designed to improve Commute Trip Reduction outcomes across the region. Their efforts are focused on meeting the needs of commuters, including rural, shift, lower-income, and other workers who are unable to utilize the existing fixed route options. Among the most effective services extensively used by King County Metro to promote carpool and vanpool opportunities is RideshareOnline.com (RSO), currently funded and administered by WSDOT until March 2027.

Community Transit currently uses RSO by submitting vanpool data and referring customers to the regional ride share database. Additionally, it hosts Community Transit's employee facing transportation incentive program. Community Transit is willing to work with King County Metro to administer RSO for Snohomish County riders.

Through their role as the Statewide administrator for RSO, King County Metro has helped promote and enable usage of the platform by other regional agencies, employer networks, and public rideshare programs such as Community Transit. This strong leadership role has led to nearly 1,300 public rideshare / vanpool groups across the Puget Sound region being promoted and administered in the platform. During a period of spiking fuel costs and climate challenges, this project supports public rideshare and all the associated benefits such as drastically reduced greenhouse gases, gasoline consumption, and vehicle miles travelled; not just for King County but also for Snohomish County and others who utilize RSO.

Thank you for your consideration.

Sincerely,

Ric Ilgenfritz
Chief Executive Officer
Community Transit

www.kitsaptransit.com

Dear Ms. O'Claire:

Kitsap Transit supports King County Metro's (KCM) Mobility Management grant application in this year's WSDOT Consolidated Grant cycle.

KCM has a strong record of developing and sustaining programs that advance Commute Trip Reduction outcomes across the region. These efforts serve all commuters, including rural, shift, lower-income, and other workers who cannot rely on existing fixed-route services. One of the most effective tools supporting carpool and vanpool participation is RideshareOnline.com (RSO), currently funded and administered by WSDOT through March 2027.

KCM's administration, promotion, and regional coordination of the RSO platform enable its use across employer networks and public rideshare programs. This leadership has helped support nearly 1,300 public rideshare and vanpool groups operating throughout the Puget Sound region.

Continued platform management will allow KCM to sustain benefits for commuters, employers, jurisdictions, Transportation Management Associations, and partner agencies. At a time of rising fuel costs and increasing climate challenges, this work strengthens public rideshare programs and delivers significant reductions in greenhouse gas emissions, gasoline consumption, and vehicle miles traveled.

We appreciate our ongoing regional partnership. For questions, please contact Tommy Fernandez, Vanpool Coordinator, at (360) 478-5858 ext. 1.

Sincerely,

A blue ink signature of John W. Clauson, written in a cursive style.

SUBJECT: Kitsap Transit In-Kind Match Valuation Plan – Mobility Management in King County (2027–2029)

Dear Ms. O'Claire,

Kitsap Transit is pleased to formally submit our In-Kind Match Valuation Plan in support of the *Mobility Management in King County (2027–2029)* project for this year's WSDOT Consolidated Grant application cycle.

To support the regional administration of RideshareOnline.com, Kitsap Transit has committed to providing in-kind support in the form of dedicated staff labor. This contribution will be made by our Commute Trip Reduction Administrator alongside two Vanpool Coordinators.

The work performed under this commitment will encompass overall vanpool administration within the RideshareOnline.com platform, targeted employer network support throughout Kitsap County, and project work for mobility management initiatives both within Kitsap County and on partnership projects.

Kitsap Transit commits to allocating 60 hours per year of in-kind staff labor across the 2027–2029 grant period. The per-hour valuation and total monetary valuation over the three-year grant cycle will be calculated and finalized in coordination with project partners based on standard agency hourly rates.

We value our ongoing regional collaboration and look forward to supporting the continued success of regional mobility management and rideshare initiatives. Please feel free to reach out if you require any additional information.

Sincerely,

A blue ink signature of John W. Clauson, written in a cursive style.

John W. Clauson
