

REGIONAL POPULATION TRENDS

The central Puget Sound region continued to grow during the pandemic, reaching a total population of 4.3 million last year.

From April 1, 2020 to April 1, 2021, the region added just 36,000 people—enough to fill about half of Husky Stadium. That’s similar to growth levels the region experienced while recovering from the Great Recession.

Since 2010, the four-county region has added nearly 640,000 net residents, likely surpassing the 4.0 million mark sometime in late 2015 or early 2016. During that period of rapid expansion, the region added more than 92,000 people in a single year.

Annual Population Change in the Region, 2010-2021

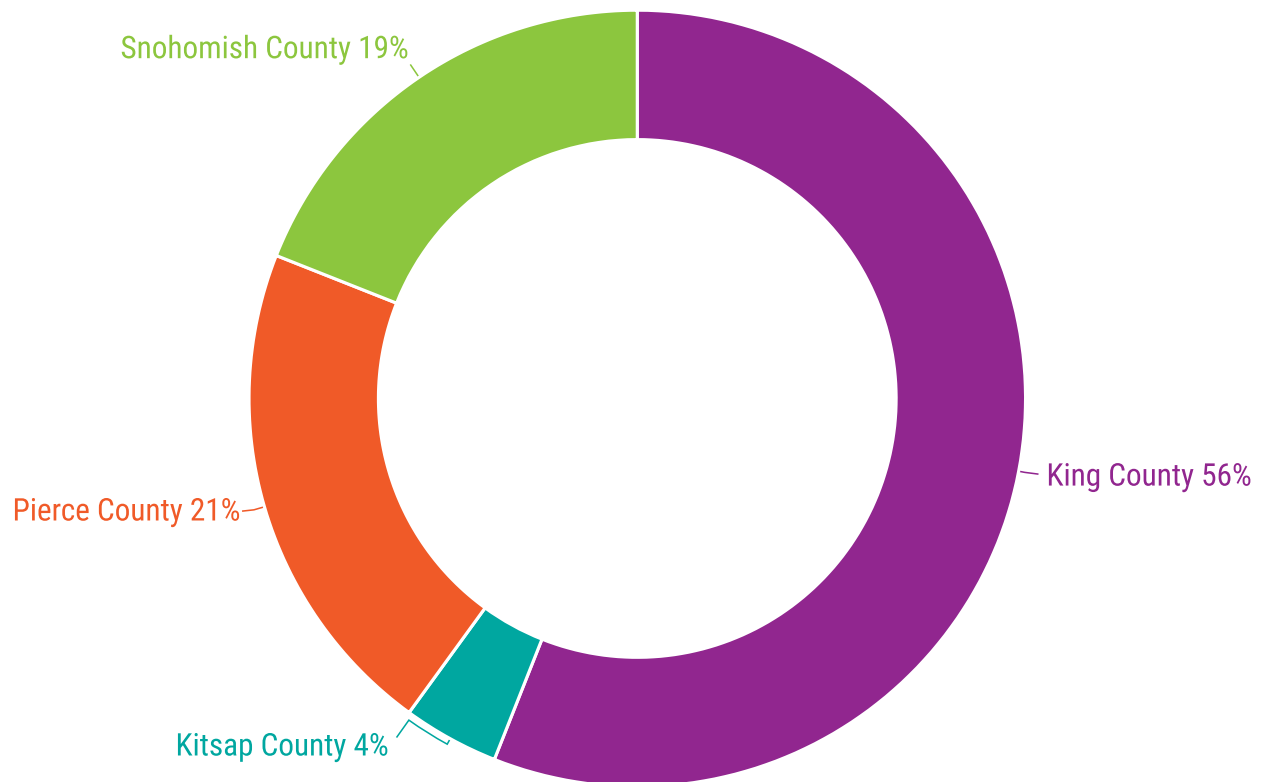

COUNTY TRENDS

King County has had the lion's share of the region's growth over the last 11 years (56%). The county's population boost was fueled by robust economic expansion, especially in the technology sector.

Of the remaining growth, 21% occurred in Pierce County, 19% in Snohomish County and 4% in Kitsap County.

King County's share of the region's overall population increased over the last decade, while Kitsap County's share decreased; Pierce and Snohomish counties largely held steady.

Percent Share of Regional Growth by County, 2010-2021

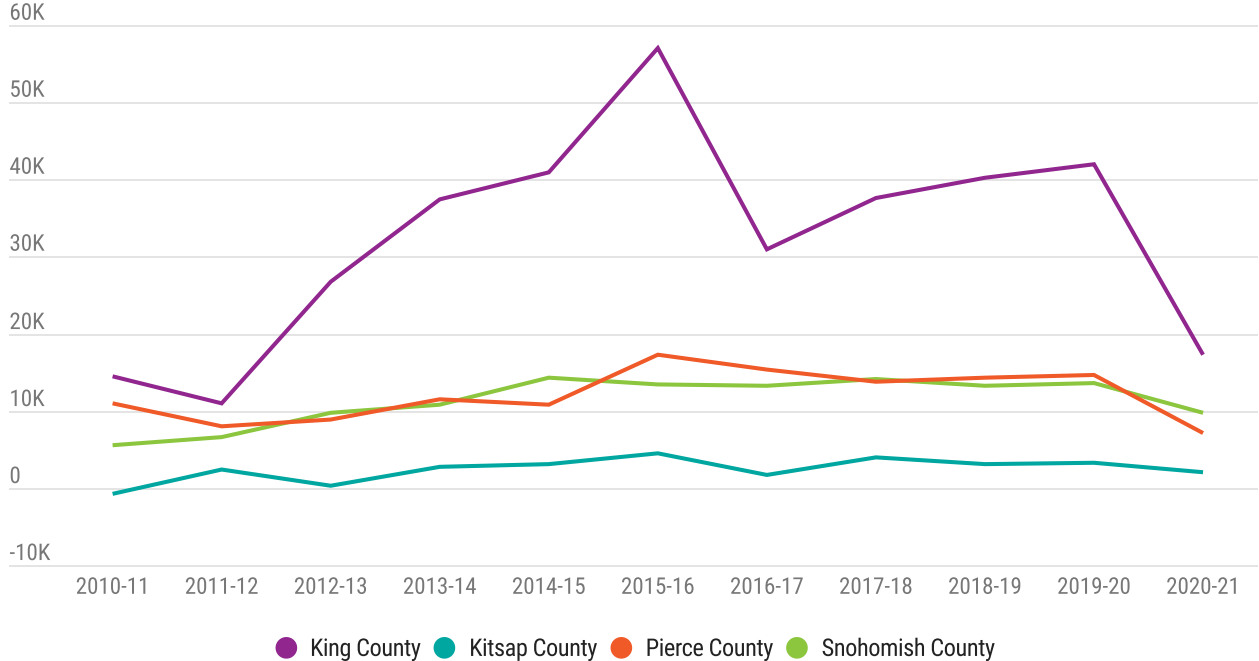

In the first year of the pandemic, all four of the region’s counties continued to gain some population but at a significantly slower pace than during the preceding year.

King and Pierce counties saw the most dramatic declines in growth rates, with levels falling off by more than half. King County grew by just 17,375 people from April 1, 2020 to April 1, 2021. By comparison, the prior year’s growth was 41,920. Pierce County added 7,070, down from the 14,625 the year before.

The slowdown in Kitsap and Snohomish counties was more modest. Kitsap County grew by 2,090, compared to 3,270 the previous year. Snohomish County added 9,845 after gaining 13,540 the prior year.

Population Change by County, 2010-2021

CITY TRENDS

Last year, following the release of redistricting data from the 2020 Census, we reported in our last Trend on [cities with the highest nominal and percentage growth](#) over the last decade.

Many of the same cities are on this year’s list of the top 10 cities with the greatest nominal growth (2020-2021) such as Seattle, Kent, Auburn, Bellevue and Kirkland.

Everett, Lake Stevens and Bonney Lake—each of which grew by more than 1,000 residents over the last year—are new to the list, as are Arlington and Edgewood.

Seven of the cities on the 2020-2021 Top 10 list have designated regional growth centers and/or high-capacity transit station areas, which are places that are planning to accommodate a substantial share of the region’s future growth per the [VISION 2050 regional growth strategy](#).

Top 10 Cities by Nominal Growth

2010-2021		2020-2021	
Seattle	128,360	Seattle	5,385
Kent*	44,180	Everett	1,670
Kirkland*	43,390	Lake Stevens	1,370
Bellevue	29,490	Kent	1,110
Sammamish*	21,680	Bonney Lake	1,025
Tacoma	20,950	Auburn	825
Redmond	19,110	Arlington	820
Burien*	18,750	Edgewood	785
Auburn	17,080	Bellevue	745
Renton	15,860	Kirkland	725

*Significant share (greater than 20%) of population growth attributable to annexation

The 10 fastest-growing places by percentage growth over the last year (2020-2021) reflect an entirely new set of cities compared to the 10 fastest-growing cities over the last decade.

Black Diamond sits at the top of this list, swelling by 13% in just one year due to new development occurring in its Ten Trails master planned community.

Many of the fastest-growing places over the last decade have been large cities increasing through both annexation and real growth. By contrast, last year’s Top 10 list has mostly small to midsize cities that expanded through real growth alone.

Top 10 Cities by Percentage Growth

2010-2021		2020-2021	
Kirkland*	89%	Black Diamond	13.3%
Gig Harbor	69%	Edgewood	6.4%
Burien*	56%	Bonney Lake	4.5%

Bothell*	44%	Lake Stevens	3.8%
Ruston	41%	Buckley	3.6%
Port Orchard*	40%	Stanwood	3.6%
Redmond	35%	Mountlake Terrace	3.3%
Orting	34%	North Bend	3.0%

*Significant share (greater than 20%) of population growth attributable to annexation

PANDEMIC-RELATED MIGRATION

There has been intense interest in the subject of remote workers relocating from Seattle to other communities, both within and outside the region, during the pandemic.

Such movers are said to be trading for homes with more living space and other amenities, as well as lower rents and housing prices, when commute distance no longer factors as strongly into residential location choice.

While OFM's population estimates can't directly tell us about migration patterns between Seattle and other communities, they do tell us that Seattle continued to grow by about 5,400 net residents during the first year of the pandemic.

We can also examine Seattle's overall share (or capture rate) of population growth in King County and the region to see if more growth is happening outside of Seattle as a result of pandemic-driven outmigration trends.

The verdict from this point of analysis is somewhat unclear.

There has not been a sharp drop-off in Seattle's growth capture rate between the year immediately preceding vs. the first year of the pandemic.

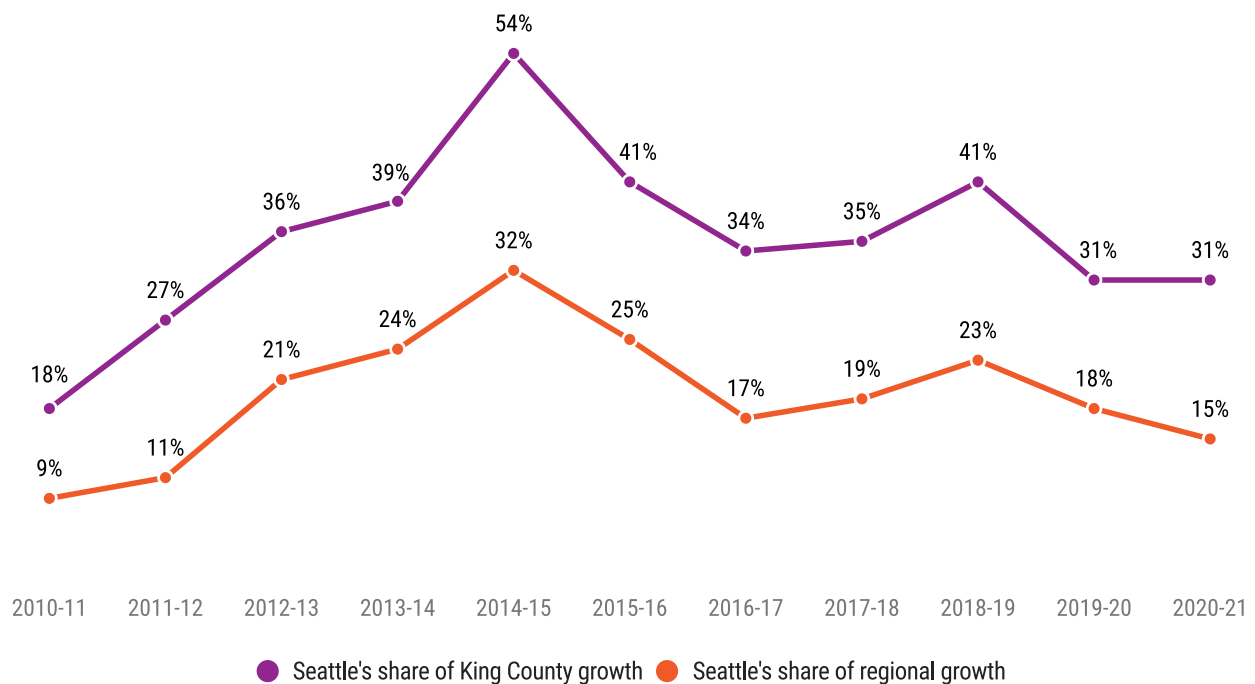

Seattle's share of King County's population growth in the first year of the pandemic (31%), in fact, shows no change from the preceding year, while the city's share of regional growth dropped modestly from 18% (2019-20) to 15% (2020-21).

The city's share of growth did show a more noticeable decline since two years before the pandemic hit (2018-19), which suggests that outmigration trends may be attributable in part to other longer-term factors such as the high cost of housing.

So what does all of this tell us?

The data doesn't necessarily contradict anecdotal evidence about the outmigration of Seattle's residents to other places, but it does suggest that perhaps the scale of the movement may be more limited than thought. Also, vacated homes appear to have been filled by new residents moving to, as well as within, Seattle.

Seattle's Share of Annual Population Growth, 2010-2021

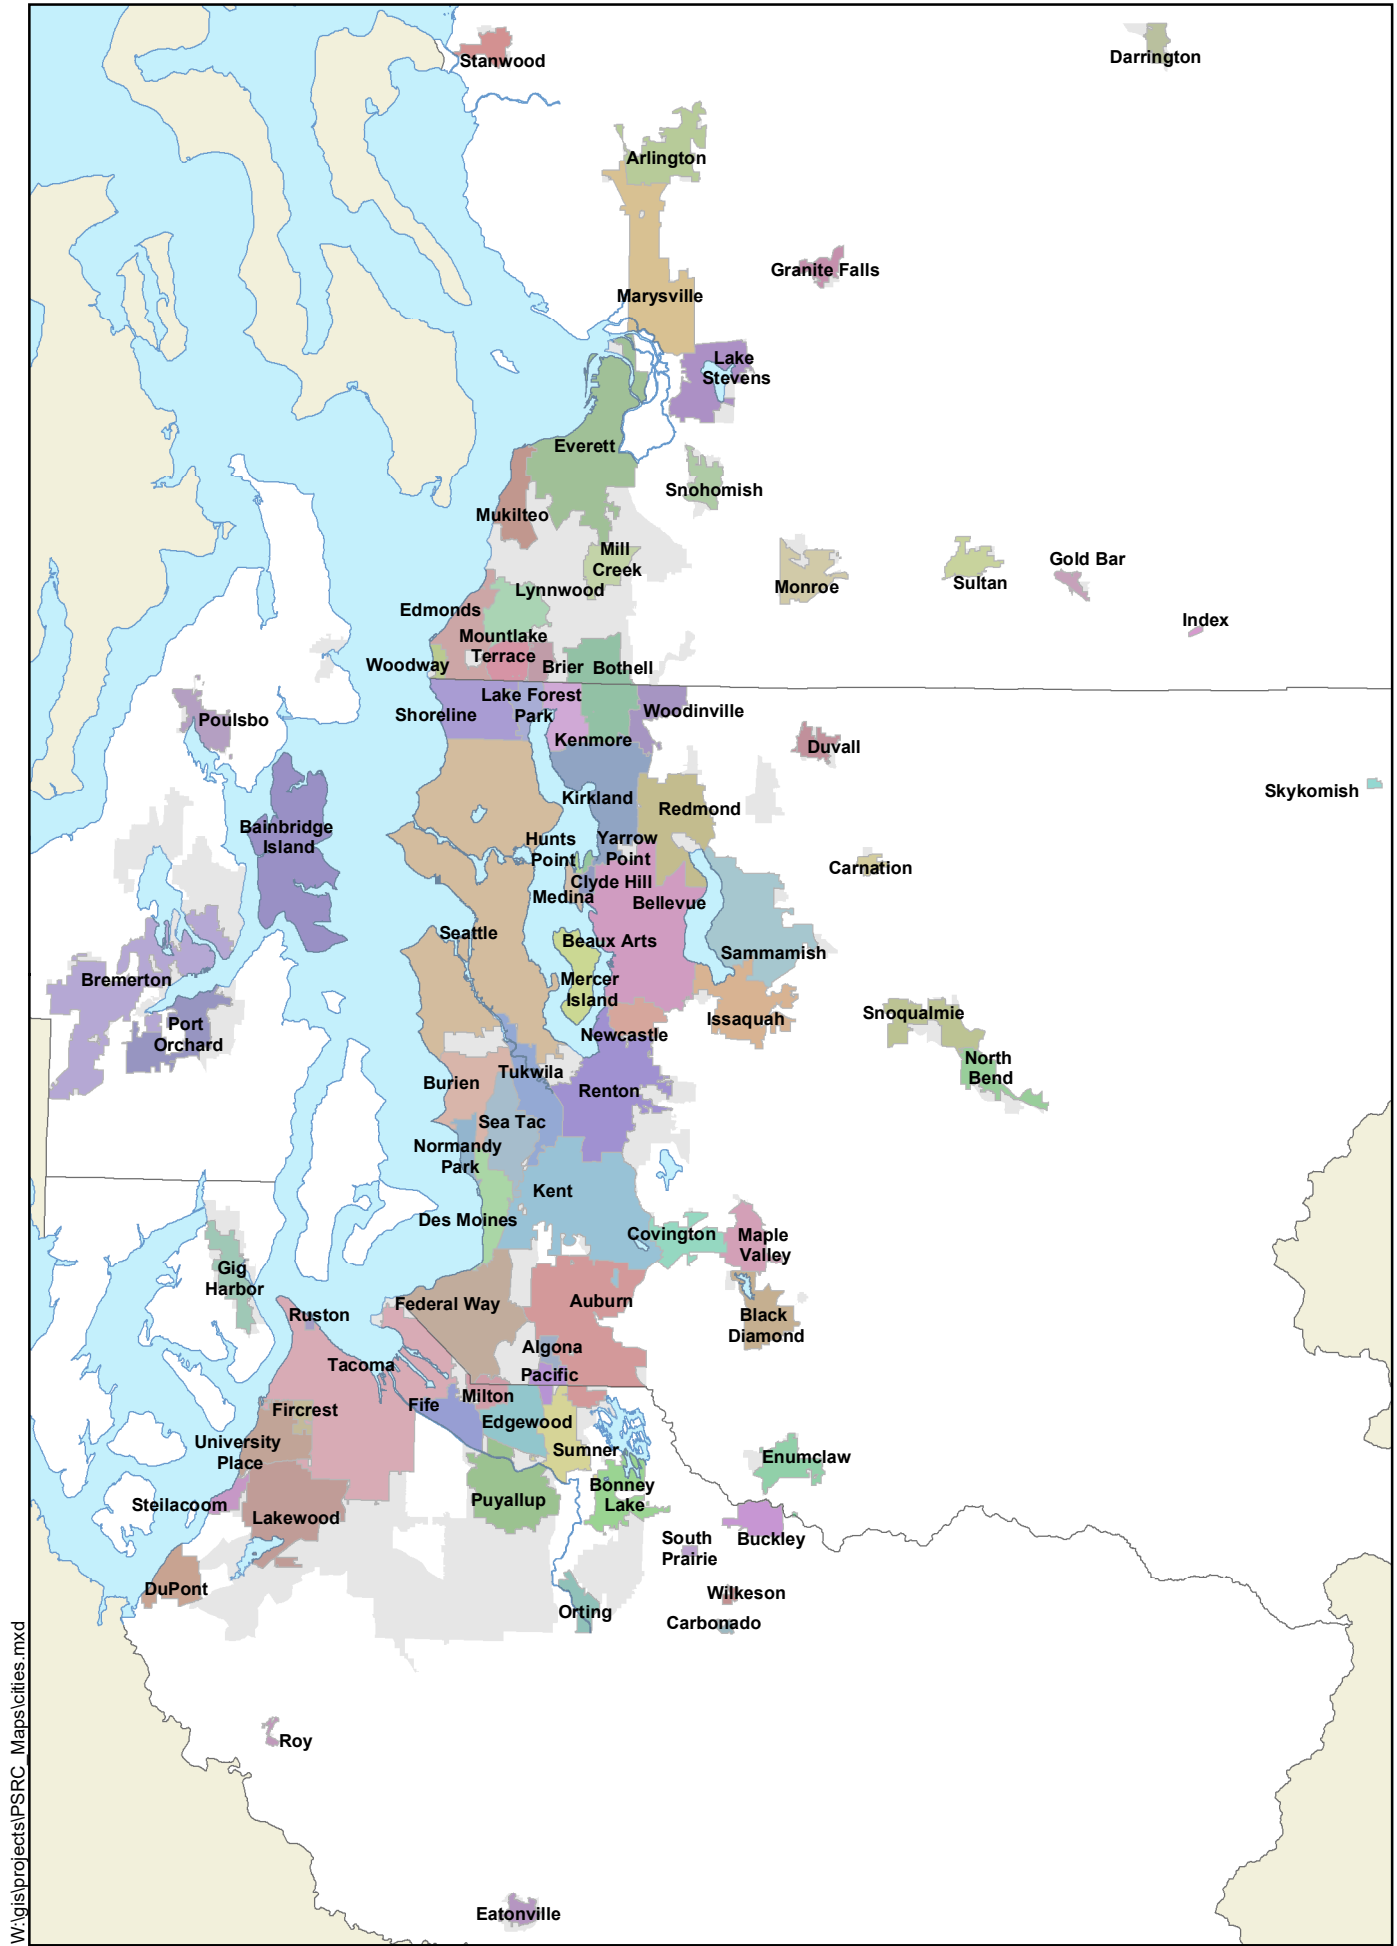

ABOUT THE DATA IN THIS TREND

Population estimates in this Trend come from the Washington State Office of Financial Management (OFM). OFM recently released its 2010-2020 intercensal estimates of population and housing for cities, towns and counties. We combined them with OFM's revised April 1, 2021 population estimates to take a fresh look at population trends in our region over the last 11 years.

These estimates are considered more accurate than OFM's postcensal estimates, since the data series is bookended on both sides by decennial census counts or state-certified special census counts. They provide the most reliable view of year-over-year change over the last decade.

OFM is set to release its 2022 population estimates for cities, towns and counties in July, which will provide another opportunity to gauge the impact of the pandemic on regional growth trends.
