

## PSRC 2026 Rural Town Centers and Corridors (RTCC) Program

### ♦ Screening Form Checklist and Guidance ♦

Project sponsors can access the [screening form and application portal](#) using the same username and password used for prior funding competitions and monthly TIP amendments via PSRC's web applications system, **but with a # symbol is added to the end of the password.**

If you do not have your agency's username, have forgotten your password, or experience any issues accessing the online system, please contact Mitch Koch at [mkoch@psrc.org](mailto:mkoch@psrc.org) or Miles Stepleton at [mstepleton@psrc.org](mailto:mstepleton@psrc.org).

## PSRC Screening Form Checklist and Guidance

The Screening Form is reviewed to verify a project's eligibility to compete for PSRC funds. Project sponsors must provide the information needed to confirm the following topics:

- General Project Information ([jump to guidance](#))
  - Project Title
  - Regional Transportation Plan Consistency
  - Certification Acceptance
- Contact Information ([jump to guidance](#))
- Project Description & Location ([jump to guidance](#))
  - Includes the Center(s) Supported
- Federal Functional Classification ([jump to guidance](#))
- Bicycle and Pedestrian Facilities ([jump to guidance](#))
- Local Plan Consistency ([jump to guidance](#))
- Project Readiness ([jump to guidance](#))
  - Estimated Project Schedule and Delivery Information
- Project Finances ([jump to guidance](#))
  - PSRC Funding Request
  - Total Estimated Project Cost & Schedule
  - Financial Documentation

Guidance for each of these topics, as well as discussion of PSRC's [screening form review process](#), is provided on the following pages.

## General Project Information

### Project Title

Should be concise but descriptive enough that the project can be distinguished from other projects of similar type.

### Regional Transportation Plan Consistency

Projects seeking PSRC funding must be in or consistent with the region's long-range Regional Transportation Plan (RTP). The determination depends on whether the project is a Regional Capacity Project or considered a programmatic investment in the RTP.

#### *Regional Capacity Project*

If the project meets the threshold that defines it as a regional capacity project, it must be explicitly included on the RTP's financially constrained Regional Capacity Project list. Guidance on the thresholds that define a Regional Capacity Project is provided [here](#).

The RTP Capacity Project List is provided in Appendix D of the Regional Transportation Plan, located on PSRC's website [here](#). Each listed project has a unique Project ID. Some projects may be connected to more than one RTP project; if this is the case, multiple RTP ID numbers may be provided.

The RTP also identifies the status of Regional Capacity Projects. Projects identified as "Unprogrammed" are ineligible to apply for PSRC funding because they are not included in the region's financially-constrained plan nor the regional air quality conformity analysis. Projects identified as "Candidate" may apply for PSRC funding but must attain an "Approved" status by PSRC's Executive Board prior to obligating right-of-way or construction funds.

#### *Programmatic Transportation Investment*

If a project does not meet the Regional Capacity Project threshold and is consistent with regional policies, it is considered a programmatic investment and does not need to be explicitly listed in the RTP. If the project is below the threshold that requires listing in RTP, enter "n/a" in the Project ID field.

For assistance or questions regarding RTP project status, please contact Mitch Koch at (206) 464-7537 or [mkoch@psrc.org](mailto:mkoch@psrc.org).

## Certification Acceptance

The Federal Highway Administration (FHWA) delegates authority to the Washington State Department of Transportation (WSDOT) for approving project development and construction administration. WSDOT delegates some of this authority to qualified local agencies through a Certification Acceptance (CA) program.

To be eligible to receive PSRC funds, a project sponsor must either have CA status or designate a sponsor agency that has CA status. **If CA sponsor is identified, please provide PSRC either an email or a letter from the sponsor agency confirming that they are willing and have the capacity to serve in that role.**

More information on Certification Acceptance and a listing of current CA agencies is provided [here](#).

## Contact Information

Provide the name and contact information of the person who will respond (or facilitate response) to any follow-up questions that result from PSRC review of the screening form.

## Project Description and Location

### Project Description

Provide a concise (300 words or fewer) but complete description of the **scope elements** included in the project. Guidance on the scope elements eligible for FHWA funds is provided [here](#).

**Please do not include description of the project justification or benefits** – instead this information should be provided in the responses to the questions in the full application.

### Project Location

Be as specific as possible about the location and extents of the project. If the location is an intersection, indicate the intersecting facilities in the “Location” field and put “n/a” in the “To” and “From” fields. Inclusion of a map that shows the project location is encouraged.

## Center Supported

Identify the center or centers that the project will support. A project may be located within a center or along a corridor serving one or more centers. The rural town center being served by a project must be identified or designated in a local comprehensive plan. Examples of rural town centers include locations designated or identified as a town center, downtown, mixed use or business district, or activity center or area.

## Federal Functional Classification

Functional classification is the grouping of highways, roads, and streets by the character of service they provide and was developed by FHWA for transportation planning purposes. A roadway must be approved on the federally classified roadway system before projects on it may use federal transportation funds (including proposed new facilities). Current FHWA-approved federal functional classifications in Washington State are provided [at this link](#).

The following exceptions apply:

- Any bicycle and/or pedestrian project
- Project not on a roadway
- Any transit project, including equipment purchase and park-and-ride lots

Funds may be requested for a project on a roadway that is planned to be added to the federal functionally classified network, but currently is not. In this case, if funds are awarded, the jurisdiction must complete the federal functional classification change process—with FHWA approval completed—prior to obligating the funds. Otherwise, the funds would be required to be returned.

For assistance determining functional classification, please refer [here](#) or contact [Kalon Thomas](#) at (206) 389-2877 or [kthomas@psrc.org](mailto:kthomas@psrc.org).

## Bicycle & Pedestrian Facilities

To comply with federal rules, bicycle and pedestrian facilities must be considered in conjunction with all new construction and reconstruction of transportation facilities, except where bicycle and pedestrian use are not permitted. Additional detail on

federal pedestrian and bicycle laws and policies is provided as [Attachment A](#) to this document.

Project sponsors should identify the bicycle and/or pedestrian facilities that are included in the project's scope, and/or already exist in the project area. If none exist or are proposed with the project, the sponsor should provide an explanation per the guidance provided.

For assistance on bicycle & pedestrian requirements, please contact Nick Johnson at (206) 463-7890 or [njohnson@psrc.org](mailto:njohnson@psrc.org)

## Local Plan Consistency

To be eligible to receive PSRC funding, projects must be in, or consistent with, the transportation element of the appropriate city or county comprehensive plan that has been (1) updated consistent with the requirements of the Washington State Growth Management Act ([RCW 36.70A.130](#)) and (2) certified, or conditionally certified, by PSRC. Applicants are asked to provide the specific citation and/or describe how the project is consistent with the policies in the local comprehensive plan. For a project on a state facility, it must also be demonstrated it is consistent with state plans, either through WSDOT review of the comprehensive plan transportation element that includes it, or consistency with a state-adopted plan.

The certification status of each jurisdiction in the central Puget Sound region is provided [here](#). For more information on PSRC's Plan Review program, please refer [here](#) or contact Liz Underwood-Bultmann at (206) 464-6174 or [lunderwood-bultmann@psrc.org](mailto:lunderwood-bultmann@psrc.org).

For transit improvement projects, consistency with a transit agency plan must be described. If the transit project would modify a street or nonmotorized facility, consistency with the certified local plan of the agency(ies) with jurisdiction over those facilities, must also be described.

State-sponsored projects must also demonstrate consistency with the certified plan of the local jurisdiction(s) in which the project is located.

## Project Readiness

Applications must identify the prerequisites that need to be satisfied before federal funding is typically eligible to obligate and demonstrate that the major project milestones are scheduled sufficiently to allow the project to deliver on time. This includes 1) understanding and identifying the obligation prerequisites that apply to the project, 2) documenting the status of each at the time of application, and 3) providing realistic completion dates for those not yet completed.

### Schedule of Project Milestones

When providing the dates of major milestones in the project schedule, it is critical that the amount of time needed to achieve them not be underestimated. For a project that has not yet completed at least 60% design this includes time in the schedule to allow for more uncertainties (e.g., true right-of-way needs are often not known until substantial design has been completed, full permitting requirements are not confirmed until a NEPA kick-off meeting with WSDOT has occurred).

Guidelines and minimum timelines that should be planned between project phases (Preliminary Engineering/Design, Right-of-Way, Construction) to confirm funding eligibility are provided [here](#). A project's minimum required timeline depends on its design status, right-of-way needs, and potential permitting requirements. To meet PSRC's Project Readiness eligibility requirements, it is expected that the project schedule will reflect the minimum timeline defined in this guidance.

If a sponsor indicates specific circumstances to justify a shorter project timeline, PSRC will review on a case-by-case basis in consultation with WSDOT, to make an eligibility determination.

### Additional Resources

For more information on obligation requirements for the use of FHWA funds, see Chapter 14 of WSDOT's [Local Agency Guidelines \(LAG\) Manual](#).

In 2019, PSRC hosted a summit on delivering projects with FHWA funds. State and federal partners provided guidance on project development, setting realistic timelines, and common obstacles experienced by project sponsors when delivering federally funded projects. The 2019 Project Delivery Summit materials are available on PSRC's website [here](#).

For questions about project readiness requirements, contact please Kalon Thomas at (206) 389-2877 or [kthomas@psrc.org](mailto:kthomas@psrc.org).

## Project Finances

Applications must provide complete information on the project's financial status by identifying the PSRC grant request, the project's total estimated cost and funding source(s) by phase.

### PSRC Funding Request

For the project phase for which PSRC funds are being requested, it must be shown that with the PSRC award, the total cost of the phase would be fully funded—with all necessary funds either secured or reasonably expected, as further described below. This is because federal legislation requires the Regional Transportation Improvement Program (TIP) to be fiscally constrained by year and include a financial plan demonstrating that projects contained within have reasonable expectation of funding through to completion.

The funding request includes the following components:

#### Funding Source

For RTCC, the only source of funds is STBG.

#### Identification of Previous PSRC Funds

If an earlier phase or other related segment of the project has previously received PSRC funds, identify the TIP ID for those programmed funds. *Note, a project phase may receive only one PSRC award for the same scope.*

#### Phase Requested for Funding

This is the project phase—planning, preliminary engineering/design, right-of-way, construction, or other—for which funding is being requested. Given the stringent expectations for project delivery and the potential risk of losing regional funds, sponsors applying for PSRC's FHWA funds may request funding for a single project phase. Requests for multiple phases are not allowed.

### **Funding Amount Requested**

This is the amount of PSRC funds being requested. As noted above, the combination of the requested PSRC funds plus all other funding must be adequate to fully fund the phase. Requests that do not result in a phase being fully funded cannot be approved into the regional TIP and therefore will be considered ineligible for PSRC funding. Refer to the Financial Documentation section below for guidance on demonstrating this requirement.

The funding request must reflect the following constraints:

1. The request must not exceed the maximum allowable amount established by the forum from which the funds are being requested. The maximum request amount for each funding source, and in some cases for different project categories, is provided in the Regional and each countywide forum's respective *Call for Projects*.
2. The remaining funds identified to fully fund the phase—when added to the requested PSRC funding amount—must meet or exceed the **minimum local match requirement of 13.5%**.

To calculate the minimum local match requirement, multiply the total phase cost by 0.135. This is the minimum amount of revenue that must be contributed from local or other non-federal sources.

#### Example:

Total phase cost = \$1,000,000

Minimum local match:  $\$1,000,000 \times 0.135 = \$135,000$

*The local or non-federal share of funding must be least this amount.*

Maximum federal share:  $\$1,000,000 - \$135,000 = \$865,000$

*The total PSRC funding request cannot exceed this amount.*

### **Funding Year Requested**

This is the federal fiscal year (2027 or 2028) for which the funds are being requested.

To align with annual delivery expectations, a project phase awarded PSRC's FHWA funds has an obligation deadline of June 1 of the program year awarded. PSRC's obligation deadline is the date by which a complete and accurate funding authorization package must be submitted to the sponsor's WSDOT regional office (as

described in chapter 21 of WSDOT's [LAG Manual](#)). This submittal deadline has been established to ensure that WSDOT has sufficient time to review and confirm accuracy for all projects with current year delivery in time to complete obligation prior to the end of the federal fiscal year.

For more information on program year and obligation requirements, see PSRC's [project tracking policies](#).

## Total Estimated Project Cost & Schedule

Applicants must provide information on the project's total estimated budget and schedule, including all phases from planning through construction, as appropriate. The estimated cost for each project phase should identify both the funding source(s) and amount(s). Information on all phases is required, not just the phase for which PSRC funds are being requested.

- For a phase that has already been completed, funding should be identified as secured, and the actual completion date provided.
- For any phase prior to the phase being requested that has not yet been completed, all funding sources must be secured or reasonably expected, and the expected completion date provided. Please refer to the next section for more information on these terms.
- For the phase being requested, the requested amount of PSRC funds should be listed as unsecured and should match the amount identified on the prior PSRC Funding Request page. All other funding sources must be secured or reasonably expected, and the expected completion date provided.
- For any future phase that follows the phase for which funding is being requested, funds may be identified as secured, reasonably expected, or unsecured, and the estimated completion date should be provided.

The estimated overall project cost and completion date must be provided. Even if the phase being requested is early in a project's development, the best estimate for the total project cost and schedule is required per federal legislation.

Note, if the project for which funding is being requested is a segment of a more expansive project (e.g., a larger corridor project being implemented in stages or phases), total cost and schedule information should be provided for the actual project (segment) that would be implemented with the requested funds.

## Financial Documentation

Documentation is required to confirm all funds that are needed to implement the phase for which funds are being requested are identified as secured or reasonably expected. This includes funds needed for any earlier phase that is not yet completed, but must be, to implement the requested phase.

For funds to be considered **secured**, they must be identified explicitly for the project in an adopted local TIP or budget document, or grant award letter.

For funds to be considered **reasonably expected**, they generally fall into the following two categories: 1) funds currently available but that require action by a responsible official or policy body to approve them for a specific project or program, and 2) funds not yet available but have historically been available and a commitment is in place to dedicate the funds for a project or program once they become available.

*Please note, anticipated future grants from other sources that have not already been secured do not meet the requirements to be considered reasonably expected.*

For further explanation of “secured” and “reasonably expected” funding, as well an overview of the conditions that must be met and examples for each, refer to PSRC’s [financial constraint guidance](#). For questions regarding project financial information, please contact Miles Stepleton at (206) 971-3051 or [mstepleton@psrc.org](mailto:mstepleton@psrc.org).

## Screening Form Review Process

**Screening forms are due Friday, March 6, 2026, by 11:59 p.m.** Screening forms will be reviewed by PSRC and comments returned in the order received, so earlier submittals are encouraged. PSRC's review comments will be returned no later than two weeks after the screening form has been submitted.

Once the project's online screening form is in progress, the sponsor may save and return to edit it at any time up until the form has been submitted.

PSRC staff will review all information provided to verify the project's eligibility to compete, based upon consistency with federal rules and PSRC's adopted [Policy Framework](#). PSRC will follow up with the project sponsor to address issues or clarifications and confirm the project's eligibility. **All revisions to the screening form must be incorporated into the final project application.**

To complete the application, the sponsor will return to their original form in the online application portal and select the *project application* option in order to respond to the remaining questions containing the project evaluation criteria. All screening form information previously provided will already be included and must include any updates confirmed with PSRC during the screening form review process.

A sponsor may begin completing the funding application concurrent to the screening form review process. However, the sponsor would be proceeding at their own risk until all issues have been resolved and eligibility confirmed. These resolutions must be confirmed by PSRC before the completed funding application can be submitted and accepted.

For questions or requests regarding the online screening form, please contact Mitch Koch at (206) 464-7537 or [mkoch@psrc.org](mailto:mkoch@psrc.org).

## Additional Questions?

For additional questions or general information about PSRC's 2026 RTCC program please contact Doug Cox at (206) 971-3050 or [dcox@psrc.org](mailto:dcox@psrc.org).

# ATTACHMENT A

## Pedestrian & Bicycle Facilities in Federally Funded Transportation Projects

Per federal surface transportation law, bicycle and pedestrian facilities must be considered in conjunction with all new construction and reconstruction of transportation facilities, except where bicycle and pedestrian use are not permitted. Transportation plans and projects shall provide “due consideration” for safety and contiguous routes for bicyclists and pedestrians. (23 U.S.C. 217(g)). New construction and reconstruction of pedestrian facilities must also meet the requirements of the Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973.

Additionally, the US Department of Transportation has adopted [policy statements](#) calling for the inclusion of bicycling and walking facilities in new construction and reconstruction projects in all urbanized areas. In rural areas, paved shoulders should be included in all new construction and reconstruction projects on roadways used by more than 1,000 vehicles per day. Projects that meet one or more of the following criteria are exempt from including bicycle and/or pedestrian facilities:

- Bicyclists and pedestrians are prohibited by law from using the roadway;
- The cost of establishing bikeways or walkways would be excessively disproportionate to the need or probable use (defined as exceeding twenty percent of the cost of the larger transportation project); and/or
- Where sparsity of population or other factors indicate an absence of need.

Project sponsors should identify the bicycle and/or pedestrian facilities that are included in the project’s scope, and/or already exist in the project area. If none exist or are proposed with the project, the sponsor should provide an explanation per the guidance provided.
