

2026 Regional Transportation Plan

Draft Regional Capacity Projects List

Note: Project costs are expressed in 2026 dollars and are sorted by sponsor.

Sponsor: AUBURN		MTP Status: Candidate
Project ID: 5893		Estimated Cost: \$3,153,000
Title: Auburn Way S (SR 164)/M St SE/17th St SE Improvements		
Description:		
<p>The project will widen Auburn Way S to add a third eastbound lane through the intersection. The project will widen the southbound 17th Street SE approach to Auburn Way S to create a double right-turn where the curb lane feeds directly to northbound M Street SE and the inside lane connects with westbound Auburn Way S. Eastbound Auburn Way S will also be rechannelized at the M Street intersection to convert the outside through lane into a shared through/right-turn lane. Restrict left turns from eastbound Auburn Way S to northbound M Street SE. Vehicles would utilize 12th Street SE for access to M Street SE from eastbound Auburn Way S. Restrict left turns from westbound Auburn Way S on the west intersection leg with curbing/median. Access to businesses on the south side of Auburn Way S would be made via a u-turn at the signalized intersection of 12th Street SE/Auburn Way S.</p> <p>Left turns from southbound M Street SE to eastbound Auburn Way S would be allowed from the far west lane, creating three lanes available for this movement. Eastbound 17th Street SE to eastbound Auburn Way S would be opened where it is currently closed at M Street SE. Northbound movements from M Street SE to Auburn Way S would be restricted and M Street SE would not provide connectivity between 21st Street SE and Auburn Way S. Mark east crossing of Auburn Way S with a new crosswalk</p>

Title: **Auburn Way S (SR-164) - Hemlock to Poplar**

MTP Status: **Approved**

Estimated Cost: **\$13,427,500**

Description:

The project will widen Auburn Way S between Hemlock St SE and Poplar St SE to accommodate two lanes in each direction, center turn lane and/or medians to provide access management where feasible, sidewalks, bus pull-outs, street lighting and storm improvements. The project will also add an eastbound turnaround and enhanced pedestrian crossing near Redwood Court. The project length is approximately 0.5 miles. The project is needed to provide additional vehicular capacity, transit, and non-motorized facilities on the corridor.

Title: E Valley Highway Widening

MTP Status: Candidate
Estimated Cost: \$12,086,500

Description:

This project will widen E Valley Highway between Lakeland Hills Way and Terrace View Drive SE, approximately 0.6 miles. The roadway will have a four/?ve lane cross section with a trail connection along the east side. Other project elements include storm improvement, illumination and ITS. The project will provide congestion relief along the corridor and provide access for non-motorized users.

Title: Bellevue Way SE Southbound HOV Lane

MTP Status: Candidate

Estimated Cost: \$60,475,000

Description:

Construct an inside High Occupancy Vehicle (HOV) lane on southbound Bellevue Way SE between the intersection of 112th Avenue SE and Bellevue Way on the north and the main entrance to the South Bellevue Park & Ride on the south end. The HOV lane segment between the South Bellevue Park & Ride and I-90 was built by Sound Transit as part of the East Link project. These improvements may extend to all legs of affected intersections to accommodate or optimize the function of the HOV lane. This project may be phased.

Title: Mountains to Sound Greenway Trail: 142nd Pl SE to I-90 Non-Motorized
Overcrossing at 150th Ave SE

MTP Status: Approved

Estimated Cost: \$26,650,000

Description:

Design and construct a section of a separated multi-use trail along the south side of I-90 from 142nd Place SE to the non-motorized overcrossing of I-90 at 150th Ave SE. In general, the trail will include a 12-foot-wide, hard surface facility, trailhead treatments, wayfinding, landscaped buffer in some areas, lighting and storm drainage improvements. This section will also provide a mid-block pedestrian crossing west of 146th St SE. This is a segment the overall project ID 5501.

Sponsor: **BONNEY LAKE**
Project ID: **5549**
Title: **Fennel Creek Trail**

MTP Status: **Candidate**
Estimated Cost: **\$39,279,417**

Description:
Fennel Creek Trail is ten-foot-wide ADA-accessible multi-use trail featuring facilities for pedestrians and bicyclists located within its own right-of-way. The Fennel Creek Trail will provide interconnectivity among Allan Yorke Park, Victor Falls Park, Lake Tapps, Downtown Bonney Lake, the Midtown Commercial District, the Sound Transit Park and Ride, Victor Falls Elementary, Mountain View Junior High, Bonney Lake High School, and surrounding residential neighborhoods. The trail will eventually provide a connection to the Foothills Trail and the proposed Flume Trail.

Sponsor: **BOTHELL**

Project ID: **4262**

Title: **Bothell Way Multimodal Improvements**

MTP Status: **Candidate**

Estimated Cost: **\$109,304,000**

Description:

The project improves Bothell Way NE / Bothell-Everett Highway from Reder Way to 240th St SE. The arterial will be improved from a two-lane roadway to four or five lanes (two through-lanes in each direction) with a two-way left turn lane where needed, intersection improvements, protected bike facility and landscaped buffers. It will fill in missing sidewalk gaps. It manages access along portions of the corridor, street lighting, improved storm drainage, and installs three fish-passable culverts.

Title: **Meridian Corridor Improvements**

MTP Status: **Candidate**
Estimated Cost: **\$131,059,700**

Description:
Implement the "Meridian Avenue (SR 161) Corridor Study", adopted by Resolution 24-0741, which was developed in support of the Comprehensive Plan goals and policies to identify necessary improvements to address congestion issues and gaps in the existing multimodal network. This roadway, which operates as State Route (SR) 161 through the City, serves as a key thoroughfare within one of the fastest growing regions in the Puget Sound area. Freight and commute trips make up a large portion of the daily traffic handled by this roadway, segments of which were last improved decades ago when regional travel demands could be accommodated by the existing roadway infrastructure. While some segments of Meridian have been recently improved to provide expanded vehicular capacity and multimodal pedestrian and bicycle facilities, the segment between 24th Street East and the City of Puyallup remains unimproved, creating bottleneck locations which limit the functionality of the entire corridor.

Title: 62nd Ave Pedestrian Bridge Over I-5

MTP Status: Candidate
Estimated Cost: \$29,681,950

Description:
Construction of a pedestrian and bicycle bridge overcrossing Interstate 5 (I-5) between Pacific Highway E and 20th Street E along 62nd Avenue East. The stated purpose of the project is “to improve safety and reliability of non-vehicular access to the Sound Transit Station and local and area businesses; while balancing effects to the natural and community environments.” This bridge, fully accessible and designed for all ages and abilities, will be a vital connection between large numbers of potential transit users, the existing Pierce Transit Routes 500 and 501, and the future Sound Transit light rail station in Fife. The 1,300 foot bridge will include two primary spans across approximately 260 feet of I-5 northbound and southbound traffic lanes located within the WSDOT right of way. The bridge and will be designed to provide a 16’ wide multiuse pathway to allow non-vehicular users to safely travel across Interstate 5.

Title: I-5 / Port of Tacoma Road Interchange

MTP Status: Candidate
Estimated Cost: \$109,562,558

Description:
This project will complete the reconfiguration of the I-5/Port of Tacoma Rd interchange into a split-diamond with one-way couplet. Port of Tacoma Rd will become a one-way SB street from 12th St E to 20th St E and 34th Ave E will be reconstructed and extended to a one-way NB street from 20th St E to 12th St E. The I-5 ramps will be reconfigured to complete the diamond couplet and the new 34th Ave E roadway includes a new bridge crossing over I-5. Traffic signals will be installed at all new intersections. FIF-16 includes phases 1 and 2A of this project. Phase 1 includes the improvements north of I-5, including adding sidewalks or paved shoulders on 12th St E. Phase 2A includes widening Pacific Hwy E with sidewalks or paved shoulders and all work south of I-5, excluding 20th St E improvements. FIF-16A includes phase 2B and the 20th St E improvements.

Title: Newport Way NW Improvements (NW Maple Street to West Sunset Way)

MTP Status: Candidate
Estimated Cost: \$74,738,858

Description:
The Newport Way NW Improvements (NW Maple Street to West Sunset Way) project enhances multimodal travel, traffic operations, and safety for all users on this critical arterial, which serves the Central Issaquah Regional Growth Center. This project’s scope includes:

- Adding sidewalks to both sides of the corridor, with wider sidewalks at the elementary school;
- Providing separated, elevated, and protected bicycle facilities;
- Landscaping between the roadway and bike lanes / sidewalks;
- Adding a second southbound lane from NW Maple Street to 900 feet south of NW Holly Street;
- Constructing roundabouts at the NW Juniper Street and NW Holly Street intersections;
- Constructing safety improvements at NW Dogwood Street and signal modifications at the Sunset Way and Maple Street intersections with Newport Way NW;
- Providing enhanced safety measures, ADA improvements, and rectangular rapid flashing beacons for pedestrian and bicycle crossings.

Other project improvements include signing, walls, channelization, illumination, wetland mitigation, stormwater detention and treatment, and other underground utilities. The design of the project is well underway. This grant would be used to acquire property rights needed for the ROW phase of the project. The property rights needed include permanent strip takes in fee and construction easements, along the limits of the project.

Estimated Cost: \$39,611,452

Description:
Retrofit existing rail trestle and build a regional trail from approximately I-405 to SE 5th St. Project components include repairing and retrofitting the existing rail trestle with a new deck and handrail system, building access ramps to the trestle, paving the trail corridor, constructing an interim gravel parking area, constructing associated stormwater facilities, lighting, and providing mitigation for streams, wetland, and buffer impacts. The project will be constructed in phases and is a portion of the broader Eastrail (East Side Rail Corridor Trail) investment included in the Regional Transportation Plan, which extends from Renton to Woodinville-Redmond Rd.

Title: ID# RR 1030: Overlake to Renton via New Castle

MTP Status: Candidate
Estimated Cost: \$110,313,578

Description:

Construct a new RapidRide line connecting Renton to Overlake via Factoria. This project will improve the attractiveness of transit between two Regional Growth Centers and will include the following elements: New transit only or BAT lanes on existing or new right of way along some of the proposed route to maintain high transit travel speeds; Major intersection investments at priority intersections to improve traffic flow, transit reliability and increase transit speeds; New transit signal priority at many of the signalized intersections along the route; Upgraded passenger amenities with better information and passenger safety to facilitate greater transit use and remove barriers of existing use by building RapidRide stations, Enhanced RapidRide stops, and standard RapidRide stops This project will also complete the Bellevue College Connector Project with transit enhancements along with pedestrian, bicycle and trail infrastructure improvements. The project will reconstruct Snoqualmie River Rd to support frequent bus service, construct sidewalks and provide accessible bus stops and a separated off-street path connecting 145th Pl SE to the Mountain to Sound Greenway Trail. This project will also include a College Transit Center to be built in partnership with the City of Bellevue and Bellevue college. This project will connect the two Regional Growth Centers, Overlake and Renton, while connecting to Bellevue College, Eastgate, Newcastle, and Renton Highlands. The project will also increase access to other regional transit services including I-405 at SR 167 and Link Light Rail at the Redmond Technology Center.

Title: **ID# RR 1071: RapidRide R Line**

MTP Status: **Candidate**
Estimated Cost: **\$131,791,962**

Description:

Construct a new, 9-mile RapidRide line, replacing existing local Metro Route 7 and connecting Rainier Beach Link station to downtown Seattle, via S Henderson St, Rainier Av S, and S Jackson St. This project would improve the attractiveness of transit in an urban corridor and include the following elements: Speed and reliability improvements (intersection upgrades, transit signal priority, queue jumps, and new transit priority lanes on existing right of way toward improved travel time savings, traffic flow, and transit reliability); Passenger facility improvements (45 new, RapidRide-branded stations at both existing and new passenger zones between Rainier Beach Link station and Third Avenue in downtown Seattle, including enhanced passenger information and safety elements); Access to transit improvements (pedestrian upgrades and bicycle enhancements, removing barriers and improving accessibility); Communications and technology improvements (enhancing the customer experience and improving bus operations), and improved Trolleybus infrastructure. This project will connect residential areas with employment, education, shopping, healthcare, and entertainment directly within the corridor and by connections with other transit services, including Sound Transit's Link 1 Line at Rainier Beach, Mount Baker, and Chinatown/International District stations, and Link 2 Line at Judkins Park station. The R Line project estimates a 2031 service launch.

Title: **Priority Bus Corridor 5 Greenwood**

MTP Status: **Candidate**
Estimated Cost: **\$10,233,468**

Description:

Previously known as the `Seattle Priority Bus Corridor 15` (T2040 ID: 5156). Improve speed and reliability for bus service on the corridor consistent with priority bus network standards. This project will directly serve Metro route 5 but the benefits will also serve other routes operating on this corridor. Speed and reliability improvements may include: TSP, bus bulbs, BAT lanes or transit lanes, rechannelization, and signal modifications. Maintain bicycle and pedestrian access through the corridor, including to the transit stations and stops. Upgrade passenger amenities at bus stops and stations by adding real-time information, shelters, lighting, and accessibility improvements to support multimodal connections.

Project ID: 5741
Title: Scriber Creek Trail

MTP Status: Candidate
Estimated Cost: \$52,564,102

Description:

The City of Lynnwood is proposing to improve the Scriber Creek Trail to provide a shared use/multi-modal trail. The full scope of this project converts approximately three miles of mixed condition (walking paths, sidewalks, undeveloped right-of-way, asphalt trail) into a non-motorized transportation connection from the regional Interurban Trail (at the south end) to the City's Lund's Gulch Open Space (the north end). The proposed trail is designed as accessible, shared-use infrastructure with hard surfaces. The trail will feature hard surfaces for at-grade sections, elevated boardwalks in wetland areas, and bridges at stream crossings. Street crossings will be enhanced with improved channelization, signage, lighting and ADA curb ramps.

Location / Facility:
Scriber Creek Vicinity

MTP Status: **Candidate**

Estimated Cost: **\$216,700,000**

Description:

The Canyon Rd. E. freight corridor will connect the Frederickson Manufacturing Industrial Center with the Port of Tacoma and destinations northward (e.g. Seattle). This project will extend Canyon Rd. E. from the intersection of 52nd St. E./62nd Ave. E. to 70th Ave. E., with two through lanes in each direction and left-turn lanes where appropriate. The project will remove the functionally obsolete Milroy Bridge and construct a grade-separated span over River Rd. (SR 167), the Puyallup River, and North Levee Rd. E. on a new alignment approximately 1,400 feet upriver. Non-motorized facilities will include paved curb, gutter, and sidewalk, separated paths beside the bridge approaches, and a shared-use path suspended beneath the new bridge over the Puyallup River. A second, smaller bridge will extend Canyon Rd. E. over Clarks Creek. The project will include several traffic signal improvements, illumination, and storm drainage facilities.

Title: **South Hill: Meridian Avenue E/SR 161 Park-and-Ride**

MTP Status: **Candidate**

Estimated Cost: **\$18,450,000**

Description:

The project will build a new 350-space Park-and-Ride and bus turnaround facility with improved bicycle and pedestrian access for northbound travelers in the Meridian Avenue E Corridor (SR 161). Replaces a Route 402 bus pullout and single shelter at the south end of the service area in South Hill-Puyallup that is currently operating over capacity. The proposed Park-and-Ride project will also provide multiple bus shelters and other passenger amenities, plus an operator comfort station and passenger safety and security improvements where none exist today. By providing improved drop off or Kiss-and-Ride facilities at this location, Pierce Transit can set the foundation for even more frequent and direct service from the southeastern end of the county into Downtown Puyallup, a designated regional growth center. Constructing a full-service passenger and operator facility at this location will create a hub for higher capacity, Fast, Frequent, and Reliable Newtwork service in the future.

Title: 14th Ave S Connection

MTP Status: Candidate
Estimated Cost: \$5,255,000

Description:
Potential lane reduction to expand sidewalk/trail space on east side of 14th Ave S in South Park to create connection between the Green River Trail (KC Parks in 2027 planned construction) and the Georgetown to South Park Trail (SDOT 2025 Construction). There are already off-Peak parking/ Peak parking restrictions. The potential rechannelization would take two Peak-hour only travel lanes down to one in either direction with a center turn lane. Early modeling shows improved turning movements for freight due to wider turn lane radius at intersections.

Title: 15th Ave W & Elliott Ave W | Multimodal Improvements

MTP Status: Candidate
Estimated Cost: \$156,073,500

Description:

This project will work hand in hand with the opening of the Ballard Link light rail station to improve connections to local businesses and neighborhoods for people walking, rolling, biking, and taking transit. This will also improve reliability for freight vehicles.

This project could include:

- Repaving portions of the street.
- Redesigning the street to better support transit and freight vehicles, including potential bus- and freight-only lanes.
- Repairing sidewalks and enhancing opportunities to cross 15th and Elliott.
- Improving access to local businesses for people walking, rolling, and biking, as well as vehicles making deliveries.

Pavement restoration is planned on both Elliott Ave and Western Ave, from Thomas Street to Bell Street, in the Belltown neighborhood. The base scope assumes mill and overlay with associated curb ramp and drainage upgrades. Based on the outcomes of SDOT's Complete Streets review and funding availability, the pavement restoration project scope may also include bike facility upgrades, signal upgrades, sidewalk repair, rechannelization, and other safety and mobility improvements. Safety Project improvements may also include lane rechannelization, transit lanes, speed management, and intersection improvements.

Title: Chinatown-International District Station | Multimodal Improvements

MTP Status: Candidate
Estimated Cost: \$31,792,750

Description:
This project is a collection of high-priority CID station access projects that should be coordinated with delivery of Sound Transit commuter and light rail investments in the CID:

- I-5 underpass improvements: S Jackson (between 8th Ave S and 10th Ave S), S King St (between 8th Ave S and 10th Ave S), and S Dearborn St (between I-5 offramp and 10th Ave S). Includes pedestrian scale lighting, upgrading pedestrian facilities, landscaping, art and wayfinding.
- S Royal Brougham Way (between 3rd Ave S and 6th Ave S): Bicycle and pedestrian improvements and connection to the SODO Trail
- Seattle Blvd S and S Dearborn St: Reconfigure major freight routes to rebalance freight movement and local pedestrian connections between 'South of CID' station and Sounder Station, including intersections improvements
- 2nd Ave S Ext (S Washington St to 4th Ave S): Re-build and reallocate space to support pedestrians moving east-west along Jackson over the railroad tracks
- Yesler Way (Alaskan Way to 4th Ave): paving, bicycle and pedestrian improvements to prioritize connections between Colman Dock and light rail stations
- 4th Ave (Jefferson St to S King St): Enhance walking and bicycling connection into CID from the 'North of CID' light rail station
- King Street Festival Street enhancements along existing neighborhood greenway in Little Saigon

Title: East Marginal Way | Multimodal Improvements

MTP Status: Candidate
Estimated Cost: \$200,900,000

Description:
In collaboration with WSDOT, this multi-phase project will improve East Marginal Way, which serves as a major freight corridor and connection for people between the West Seattle Bridge Trail, downtown, and the SODO neighborhood.

- North Segment - S Atlantic St to S Spokane St
- Central Segment - S Spokane St to Diagonal Ave S
- South Segment - Duwamish Ave S to 1st Ave S
- Pavement Restoration Project - 1st Ave S bridge to 1000 ft south of 16th

This project could include:

- Redesigning the street to better support freight vehicles, including potential freight-only lanes
- Repairing and widening sidewalks and improving bus stops and crossings
- Implementing Intelligent Transportation System improvements to make traveling along this busy street more efficient, safe, and predictable

Pavement restoration project on south section of E Marginal Way S ?from 1st Ave S bridge to Seattle City Limit includes 2" asphalt mill & overlay, base repairs, ADA curb ramps, Stormwater Code mandated drainage improvements, striping, signing, pushbutton relocations, and signal loop restoration. Pavement restoration project will also evaluating Complete Streets elements including a shared use path and crossing improvements.

Title: Martin Luther King Jr. Way | Multimodal Improvements (Rainier Ave S to city limits)

MTP Status: Candidate

Estimated Cost: \$70,333,000

Description:

This Complete Street project creates a safer space for people walking, bicycling, and taking transit through the heart of the Central District:

- Incorporates transit capital and operational enhancements including upgrades to transit stop and rider amenities
- Includes AAA bikeway (PBLs or upgrades to parallel NHG/Healthy Street) and sidewalk improvements, street trees, and crossing enhancements along the entire project
- Accommodates Minor Truck street design elements where appropriate
- Includes Destination Street between S Washington St and S Dearborn St
- Improves safety for vulnerable users, increasing safe access to the light rail stations, while supporting reliable freight travel
- Pursues a range of strategies to slow vehicle traffic and create a safer, more comfortable travel experience including introducing off-peak on-street parking/curbside functions, adding street trees, curb extensions and crossing enhancements, and operational strategies to reduce vehicle conflicts with pedestrians
- Phases in AAA bikeway (PBLs, while protecting emergency access and minimizing impact on freight travel, or upgrade parallel NHG/Healthy Street)
- Builds Destination Streets between Columbian Way and S Edmunds St, between S Willow St and S Webster St

Title: NE 130th St Station: Corridor Access & Safety Improvements

MTP Status: Candidate
Estimated Cost: \$96,985,229

Description:
The project will provide areawide multimodal transit access and safety improvements around the NE 130th St light rail station. The project includes a phased series of planned and potential lane reconfigurations on select roadway segments to calm traffic and improve safety along the corridor. Lane conversions will impact roadway capacity along this principal arterial to accommodate enhanced bike facilities and in-lane bus stops. Some of the roadway segments to be rechannelized are confirmed, along NE 130th and Roosevelt Way NE, while others will be evaluated for potential inclusion through the design process (along NE 125th). Safety measures and multimodal enhancements are also being evaluated, e.g., new and improved transit stops and amenities, pedestrian crossing improvements, signal improvements, bicycle facilities, etc.
The western portion of the corridor includes a new street design with protected bike lanes, sidewalk repairs, crossing upgrades, new accessible curb ramps, and new street trees. We are also supporting new bus service in the area with upgraded and relocated bus stops, a full street reconstruction for heavier bus and freight vehicles, and other bus priority features.

Title: Rainier Ave S | Transit + Multimodal Improvements

MTP Status: Candidate
Estimated Cost: \$50,904,950

Description:
This project includes STP Projects 67 and 68. The transformational Rainer Ave S Complete Street project serves as a major, multi-modal investment between South Seattle, the Judkins Park light rail station, and Seattle's Center City. This project will also support King County Metro's upgrade of Route 7 to RapidRide. Improvements along this corridor include Rainier Ave S from Ithaca Pl S to Jackson; S Jackson St from Rainier Ave S to 4th Ave S; 4th Ave/Prefontaine Pl S/3rd Ave from Jackson St to Pine St; S Henderson St from ML King Jr Way S to Rainier Ave S; 37th Ave S from S Edmunds St to S Ferdinand St and S Ferdinand St from 37th Ave S to 39th Ave S.

- This project could include:
- Leveraging AAC improvements, incorporating freight and transit capital and operational enhancements
 - Supporting this Tier 1 Transit Capital Corridor (part of RapidRide R) and Major Truck route including potential transit-only or FAB lanes
 - Sidewalk improvements and adding numerous high-priority enhanced crossings plus a AAA bikeway (PBLs or upgrades to parallel Neighborhood Greenway/Healthy Street)
 - Major street redesign and reallocation of curb space
 - Implementing Intelligent Transportation System improvements
 - Enhancing access to destinations like shops, restaurants, and cultural centers in the area
 - Making streets more enjoyable for people walking and rolling

Title: Seattle Priority Transit Lanes

MTP Status: Candidate
Estimated Cost: \$23,752,600

Description:

Design and build transit priority travel lanes. Convert existing lanes or right-of-way into dedicated lanes, increase visibility and compliance, support with transit signal priority, capital construction, or other efforts as needed to improve transit travel times and reliability. Improvements are focused on transit lanes along Seattle's Frequent Transit Network where routes encounter significant delay, but may include transit-and-freight lanes, convertible lanes, and other lane conversions that maximize the usefulness of the right-of-way. These locations are currently proposed for feasibility study:

- N 145th Street (west of I-5)
- Roosevelt Way south of 92nd St to the cut
- NE 50th St from Green Lake Way to 15th Ave NE
- 12th/11th Ave NE south of N 80th St
- NE 75th St from Roosevelt to 25th Ave NE
- W Nickerson St from 15th Ave W to Fremont Ave N
- Queen Anne Ave N and 1st Ave N from Denny to Roy
- E Olive Way from 3rd to Denny
- Fauntleroy Wy SW between SW Edmunds and SW Morgan

Title: Southwest to Southeast Seattle | Transit + Multimodal Improvements

MTP Status: Candidate

Estimated Cost: \$108,253,000

Description:

This multi-phase project improves the rider experience and transit and truck travel reliability along this Tier 1 & 2 Transit Capital Corridor, and for some segments, designated truck street

- Invests in operational and capital improvements, including potential transit-only lanes or FAB lanes
- Includes AAA bikeway in several segments and spot improvements for sidewalk repair and priority enhanced crossings throughout
- Upgrades transit stops and rider amenities
- Includes Destination Street improvements on Delridge Way SW between SW Henderson ST and SW Roxbury St
- Paving along Ellis Ave S from E Marginal Way to I-5, which could potentially include a bike project
- Paving and sidewalks along Olson Pl SW from 2nd Ave SW to SW Cloverdale St, which could potentially modify lanes to accommodate sidewalks pending analysis

Title: **148th Street Non-Motorized Bridge**

MTP Status: **Candidate**
Estimated Cost: **\$39,713,502**

Description:

The 148th Street Non-Motorized Bridge project constructs a new ped/bike bridge spanning I-5 and connecting westside neighborhoods to the Shoreline South/148th Station (Sound Transit light rail and future BRT). Improvements will include integration with station's north plaza area (east side of I-5) including ramps and stairs. Westside landing improvements will include ramps, stairs, and a pedestrian/bicycle path connecting to 1st Ave NE. This project is being constructed in two phases: Phase 1 includes full project design (SL-25) and construction of the improvements on the east side of I-5 (SL-25A) and Phase 2 (SL-25B) includes right-of-way acquisition and construction of the improvements on the west side of the freeway, including the bridge superstructure, landing, and shared-use path connection to 1st Ave. NE.

Title: **15th Ave NE Corridor Improvement (NE 175th St to NE 205th St)**

MTP Status: **Candidate**
Estimated Cost: **\$9,278,343**

Description:

This project would construct sidewalks and accessible bus stops on the west side of the road from NE 180th St to NE 205th St. There are significant topographic challenges related to constructing a sidewalk on the west side of this arterial. A corridor study will be performed to identify a preferred transportation solution for this roadway segment. Alternatives to accommodate bicycles will be analyzed, including rechannelization of the roadway from four lanes to three. The cross-section of the road from NE 175th St to NE 180th St would be reduced from four lanes to three and bicycle lanes would be installed. Right-of-way may need to be purchased to complete this project. This project is currently unfunded and a specific year for funding is not known.

Title: **175th Street (3rd Ave NE to 15th Ave NE)**

MTP Status: **Candidate**
Estimated Cost: **\$2,216,050**

Description:

Safety improvements along NE 175th Street between 5th Ave NE and 15th Ave NE are needed to address a high occurrence of collisions, including serious injury and fatality collisions, along this segment of roadway. The project will include a reconfiguration of the roadway from 4 lanes to 3 lanes as a proven safety countermeasure which would reduce conflict points allowing safer turns to and from the corridor, and would improve safety for pedestrians by reducing exposure, increasing the distance between moving cars and pedestrians on the sidewalk, and improving sight lines to and from crossing pedestrians. This project is funded by a Highway Safety Improvement Program grant. The project will estripe 1 existing 4-lane roadway to 3-lanes (1 each way + center turn lane), add bike lanes, add pedestrian crossing improvements.

Title: Ballinger Way Access Control (NE 205th St to 25th Ave NE)

MTP Status: Candidate
Estimated Cost: \$17,564,380

Description:

Access control and pedestrian improvements along this corridor are needed to address vehicle and pedestrian collisions as identified in the City's Annual Traffic Report. Preliminary design to determine the scope of access control and intersection improvements is needed as a first step. Scoping will also identify pedestrian and bicycle safety improvement opportunities, specifically related to midblock crossings. Right-of-way may need to be acquired in order to provide U-turns at signals and/or at access points. The project is anticipated to improve safety/mobility via: 1) Access control (medians, limited turns, U-turns); 2) Ped/bike facilities (wider sidewalk, amenity zone, off-corridor bike path, midblock crossings); 3) Signal improvements (ADA, ITS, TSP, bus stops).

Title: **N 175th St. Corridor Improvement (Stone Ave N to I-5)**

MTP Status: **Candidate**
Estimated Cost: **\$88,630,399**

Description:

The planned improvements to N 175th Street are a high priority project as the corridor is one of Shoreline's principal arterials that provides direct access to I-5 for the vehicular traffic, transit, and freight. This project proposes to improve the section of 175th Street between Stone Avenue (termination of past Aurora Corridor project improvements near the Interurban Trail) and I-5. The project area has high traffic and pedestrian volumes given the proximity to Aurora / Highway 99, elementary schools, transit routes, a church with a Park & Ride lot, and Ronald Bog park. The corridor has substandard pedestrian and bike facilities.

Title: **SR-523 (N/NE 145th St) Corridor Improvements, Aurora Ave N to I-5**

MTP Status: **Candidate**
Estimated Cost: **\$77,600,319**

Description:

This project is part of the implementation of the 145th Street Multimodal Corridor Study. The project will make improvements to signalized intersections between I-5 and Aurora Ave N in order to improve transit service, general purpose traffic, and pedestrian crossings. The project will also improve pedestrian facilities along its full length of the north side of the street. Bike facilities will be provided through construction of an Off-Corridor Bike Network between the Interurban Trail to the west and 1st Ave N to the east with connections to City of Seattle's planned off-corridor bike facility south of 145th Street. Design elements will include: Improvements to signalized intersections, adding left turn lanes and adjusting signal timing. A new pedestrian signal at Corliss Avenue. Improved sidewalks and crosswalks, pedestrian countdown signals, and Americans with Disabilities Act (ADA) accessible curb ramps. Utility relocation. Connections to a strengthened off-corridor bicycle network. The project will be phased for right-of-way acquisition and construction as follows: Phase 1: I-5 to Corliss Phase 2: Corliss to Wallingford Phase 3: Wallingford to Aurora Avenue (Interurban Trail).

Title: **SR-523 (N/NE 145th Street) & I-5 Interchange Improvements**

MTP Status: **Approved**
Estimated Cost: **\$48,498,490**

Description:

The City of Shoreline has completed design of the 145th Street/I-5 Interchange project which is currently under construction. The City's initial improvement concept, as included in the City's Preferred Design Concept report, proposed a new I-5 northbound on-ramp, revised 145th bridge deck channelization, and a new pedestrian bridge adjacent to the existing bridge deck. In 2019, the City revised the concept to include two multi-lane roundabouts to replace the two existing signalized interchange intersections. Traffic modeling of the roundabouts demonstrated better performance for transit and general-purpose traffic than the initial improvement concept, and at a lower cost. The project includes improvements to I-5/145th interchange mobility/safety/access for all modes. Replacement of signals with two multi-lane roundabouts. Repurposing of bridge deck for 2-way protected bike lane & ADA sidewalks.

Title: **Trail Along the Rail**

MTP Status: **Candidate**
Estimated Cost: **\$12,522,035**

Description:

This project will provide a 2.5 mile multi-use trail that roughly parallels the Lynnwood Link light rail guideway from Shoreline South/148th Station, along the Shoreline North/185th Station, and to the 195th Street Pedestrian Overcrossing. Agreements with Sound Transit guaranteed that the light rail design and construction would not preclude placement of the Trail Along the Rail in the future. The City will complete a Master Plan first and determine if the Trail should be designed as the complete corridor or in sections. In order to be more competitive for funding and to better utilize development partnership opportunities, it may require the project to be designed and/or constructed in segments.

Title: Westminster N (N 145th St to N 153rd St)

MTP Status: Candidate
Estimated Cost: \$6,837,185

Description:
As part of the New Sidewalks Program, this project will construct sidewalk along one side of the street. Due to Right-of-Way, topogography, and funding constraints, alternatives analysis exploring the option of repurposing a vehicle lane for sidewalks will be conducted. It is possible the existing vehicular lane configuration will remain, or an alternative 4 to 3 lane conversion may become the preferred alternative.

Title: **Downtown Seattle LRT Tunnel and Link LRT Extension to Ballard**

MTP Status: **Candidate**

Estimated Cost: **\$12,513,781,895**

Description:

This project builds a second light rail tunnel in downtown Seattle that provides capacity for the entire system to move through this area. The tunnel will be constructed as part of the Ballard to downtown Seattle light rail project, which includes a tunnel that extends from downtown Seattle through the Seattle Center/Uptown and South Lake Union neighborhoods. The downtown tunnel will extend from International District/Chinatown to the Denny Station with four new and expanded stations at International District/Chinatown, Midtown, Westlake, and Denny. (RTP project ID: 5684)

This project builds light rail from downtown Seattle to Ballard's Market Street area with a new rail-only subway through Seattle Center/Uptown and South Lake Union. The project will be constructed in conjunction with a new downtown Seattle light rail tunnel, which will extend from International District/Chinatown to the Denny Station. The Ballard to downtown Seattle project includes elevated light rail on 15th Avenue West and Elliott Avenue West and rail-only movable bridge over Salmon Bay. Five new stations serve the areas of South Lake Union, Seattle Center, Smith Cove, Interbay and Ballard. (RTP project ID: 5683)

Title: **Link LRT Extension from Angle Lake to Federal Way**

MTP Status: **Approved**

Estimated Cost: **\$2,800,158,191**

Description:

The Federal Way Link Extension project is a 7.8 mile extension of light rail from the city of SeaTac's Angle Lake Station to the Federal Way Transit Center with service to the cities of Des Moines, Kent, and Federal Way. Operating in exclusive right-of-way, the project generally parallels I-5 on an elevated or at-grade alignment. Trains will serve three stations: Highline College in Kent/Des Moines; South 272nd in Federal Way; and the Federal Way Transit Center at 23rd Avenue South. The stations will feature new and expanded parking facilities providing approximately 1,500 new parking spaces.

Title: Stewart Road Corridor Completion: White River Bridge

MTP Status: Approved

Estimated Cost: \$40,825,774

Description:

This project will replace the existing two lane bridge over the White River at Stewart Road. The existing bridge will be removed. The new bridge will accommodate four lanes of traffic and a separated shared use path on the north side of the roadway. Adjacent intersections at Butte Avenue and 140th Street Court East will be modified to accommodate the new roadway grade and lane configurations.

Location / Facility:

Stewart Road (8th Street) in Sumner WA

Title: Jackson Ave Vision Zero Improvements (SR 16 to 20th St W)

MTP Status: Candidate
Estimated Cost: \$1,007,575

Description:

This project is intended to improve safety, active transportation and transit access on Jackson Ave, in alignment the City's Comprehensive Plan, Vision Zero Action Plan, and Climate Action Plan. Specifically, Jackson Ave includes planned separated bikeways in the Transportation and Mobility Plan. Like all Tacoma roads - but particularly important on our busiest streets - pedestrian access and safety along the corridor and at crossings are priorities. This corridor is included in the TMP's planned arterial pedestrian network. Jackson Ave also includes on/off ramps to SR16 which cause particular concern for active transportation safety, particularly given the crossings for the Scott Pierson Trail.

Impacts to vehicular lanes may be required in order to construct planned active transportation improvements and address safety issues along the corridor.

Title: Puyallup Ave Transit/Complete Street Improvements

MTP Status: Candidate
Estimated Cost: \$42,537,500

Description:
Reconstruction of a roadway with complete street elements including sidewalks/curb ramps, bulb-outs, crosswalks, signals, lighting, landscaping, bus stops, upgraded utilities, and a shared HOV/transit lane, as well as minor improvements to side streets to reorient/increase functionality of parking spaces, and other street amenities. The pavement design for driving lanes will meet heavy haul standards. Bike lanes/active transportation facilities will also be added, with additional State funds, to provide Fife to Tacoma pedestrian access, adjust the ramp at the Portland/Puyallup intersection, and connect this project’s amenities to WSDOT’s regional bike lane improvements along SR 167.

Title: E Marginal Way (N City Limit to Boeing Access Road)

MTP Status: Candidate
Estimated Cost: \$10,230,525

Description:

Design and construct curb, gutter, drainage, lighting, turn lanes, and traffic control. The east sidewalk would be widened into a shared-use path, extending from the Museum of Flight to the northern city limits. A lane reconfiguration would reduce the road to one general-purpose lane in each direction, creating space for a potential bus lane, pending further study and coordination with King County Metro. To improve pedestrian safety, raised refuge islands are recommended at three locations to support two-stage crossings and calm traffic, while Rectangular Rapid Flashing Beacons (RRFBs) and high-visibility crosswalks with curb ramps are proposed at key intersections to facilitate safer east-west crossings.

Title: Tukwila International Blvd (S 152nd St to S 144th St)

MTP Status: Candidate
Estimated Cost: \$4,455,675

Description:
The project includes the installation of landscaped medians to manage access and reduce left-turn conflicts, access restrictions at key driveways, and a potential road diet reducing the roadway to one lane in each direction with a separated bike lane. Additional safety features include raised pedestrian refuge islands at midblock locations, Rectangular Rapid Flashing Beacons (RRFBs) with high-visibility crosswalks at several intersections, and curb extensions at side streets to shorten pedestrian crossing distances. Floating bus islands are also proposed to maintain safe bike lane continuity at existing bus stops.

Title: I-5/ SR 512 Stage 1

MTP Status: Candidate
Estimated Cost: \$65,836,785

Description:
A high volume of westbound SR 512 morning traffic to northbound I-5 disrupts traffic flow on I-5 and causes large traffic back-ups on SR 512 between Steele Street Interchange and I-5 for both Truck and GP traffic. Additionally, a high volume of northbound I-5 traffic exiting to eastbound SR 512 in the afternoon causes large traffic back-ups between Bridgeport Way Interchange and SR 512 Interchange for both Truck and GP traffic. Widening the NB I-5 on ramp to two lanes and constructing an auxiliary lane on SR 512 from E Steele St, as well as widening the NB I-5 off ramp to SR 512 and adding an auxiliary lane, may reduce traffic congestion and increase traffic mobility.

Title: I-5: Thorne Lane to 38th St- Core HOV

MTP Status: Candidate

Estimated Cost: \$394,061,250

Description:

This section of I-5 is experiencing congestion during peak hours. This project completes the HOV lane gap between Thorne Lane and 38th St. The project includes narrowing widths on the mainline to four-foot inside shoulders, 11-foot travel lanes and 10-foot outside shoulders to accommodate the new HOV lane in each direction. In some locations where constrained by existing bridges, I-5 shoulder widths of 2 feet are proposed. The following locations would require additional reconstruction since existing widths would be inadequate for additional I-5 lanes: Replace the S Tacoma Way/ Union Street Bridge to accommodate the added mainline width; SR 512: replace the existing bridge and potentially reconfigure the interchange as a diverging diamond interchange (DDI); S 56th Street: replace the existing bridge and potentially reconfigure the interchange as a DDI.

Title: **SR 167/SR 512 to Ellingson Rd Vicinity - SB ETL Extension**

MTP Status: **Candidate**
Estimated Cost: **\$309,653,837**

Description:
Construct managed lane. This section of SR 167 experiences severe congestion and operational problems due to high traffic volumes. By widening existing roadway to add an Express Toll Lane (ETL), plus installing lane control signing, CCTV cameras, data stations, ramp meters, variable message sign and illumination, this project will reduce congestion and improve motorist safety. This project would extend the SR 167 express toll lanes in the southbound direction to the SR 410/SR 512 interchange. Existing fish passage barriers will also be removed and replaced with a fish passable structure.

Title: SR 302/Elgin Clifton Rd to 144th St - Mobility

MTP Status: Candidate
Estimated Cost: \$18,881,525

Description:

Widen from 2 to 4 lanes. A combination of a narrow historic bridge, signal, and high volumes on the westbound general purpose lane cause congestion. High volumes, signal, and narrow shoulders on bridge cause back-ups. Widening SR 302 to 4 lanes from Elgin-Clifton Road to 144th St NW to tie in with the planned new alignment from 114th St NW to SR 16. The speed improvement related to the roadway widening will have a marginal affect on air quality.

Title: SR 509 Extension (with I-5), Phase 1

MTP Status: Approved
Estimated Cost: \$1,159,558,386

Description:

This project will construct a new four lane SR 509 from S. 188th St to its connection with I-5. The project will also construct a two-lane southbound collector-distributor along I-5 to SR 516, reconstruct the SR 516 interchange into a diamond interchange and provide a connection to Veteran`s Drive. This project also constructs a NB Auxiliary Lane between SR516/Veterans onramp and SR509 Off ramp. The project constructs a half diamond to the south to connect SR509 to 28/24th Ave S. Reconstruct the S 188th St Interchange into a full interchange and construct a Southbound Auxiliary from SR516 down to S 272nd St.

Title: SR 512/SR 161 to Pioneer Ave - Mobility

MTP Status: Candidate
Estimated Cost: \$71,676,951

Description:

Add auxiliary EB & WB lanes and 2 lane off ramps. A combination of high volumes, interchange ramps, vertical and horizontal alignment may cause westbound traffic between SR 161 (Meridian) and SR 167 to be congested, particularly on the steep grade approaching SR 161 (Meridian). Special events at the Puyallup Fairgrounds can also increase traffic in this vicinity. Constructing eastbound and westbound auxiliary lanes from Meridian to Pioneer Way with two lane off-ramps at each interchange will improve mainline operations on SR 512 and will improve safety at this interchange.
