Overview of Today

• Background
• Purpose of Study
• Draft Scope of Work
• Draft Schedule
Background

• Increasing activity at the region’s airports

• Master planning is underway at several airports in the region

• Federal Aviation Administration requested PSRC complete a Regional Aviation Baseline Study

• Need to better understand the current aviation activities and how future demand will be met in the region
Purpose of Study

Provide a clear picture of the aviation activities and needs in the region and set the stage for future planning.
What’s Covered?

- All airports in the region
- All aviation sectors
- Demand/capacity *(airspace, land side and air side)*
- Community Impacts
- Economic Impacts
Draft Scope of Work

- Stakeholder engagement and education
- Identify existing conditions and trends
- Evaluate aviation issues and needs
- Final report & presentation
Draft Schedule

- February 22nd - Executive Board reviewed draft scope and directed staff to proceed
- March 1st - PSRC released Request for Qualifications
- March to June – Select consultant and finalize FAA grant
- July 2018 – Work on the study begins
- December 2019 – Study completed
